Integral geometry of unbounded figures. Publ. Inst. Mat. Univ. Nac. Litoral 1, no. 2, 58 pp. (1939). (Spanish) (Scherk) 1-265.

Integral geometry 31. On mean values and geometrical probabilities. Abh. Math. Sem. Hansischen Univ. 13, 284-294 (1940). (Spanish) (González Domínguez) 2-12.

Géométrie intégrale 32. Quelques formules intégrales dans le plan et dans l'espace. Abh. Math. Sem. Hansischen Univ. 13, 344-356 (1940). (Scherk) 2-12.

On some geometrical problems concerning aviation. Bol. Mat. 13, 66-71 (1940). (Spanish) (González Domínguez) 2-225.

A demonstration of the isoperimetric property of the circle. Publ. Inst. Mat. Univ. Nac. Litoral 2, 37-46 (1940). (Spanish) (Scherk) 2-12.

A theorem on sets of parallelepipeds with parallel edges. Publ. Inst. Mat. Univ. Nac. Litoral 2, 49-60 (1940). (Spanish) (Scherk) 2-261.

- Sur quelques problèmes de probabilités géométriques. *Tôhoku Math. J.* 47, 159-171 (1940). (Scherk) 3-253.
- A theorem and an inequality referring to rectifiable curves. *Amer. J. Math.* 63, 635-644 (1941). (Scherk) 2-353.
- Nicolas Tartaglia and the resolution of the equation of third order. *Math. Notae* 1, 26-33 (1941). (Spanish) 3-97.
- Some infinitesimal properties of plane curves. *Math. Notae* 1, 129-144 (1941). (Spanish) (Scherk) 3-306.
- Curves of extremal total torsion and D-curves. *Publ. Inst. Mat. Univ. Nac. Litoral* 3, 131-156 (1941). (Spanish, English summary) (Scherk) 3-187.
- A system of mean values in the theory of geometric probabilities. *Revista Ci.*, Lima 43, 147-154 (1941). (Spanish) (Scherk) 3-5.
- The mean value of the number of parts into which a convex domain is divided by n arbitrary straight lines. *Revista Unión Mat. Argentina* 7, 33-37 (1941) = *Unión Mat. Argentina*, Publ. no. 17, 7 pp. (1941). (Spanish) (Scherk) 3-90.
- Generalization of a problem of geometrical probabilities. *Revista Unión Mat. Argentina* 7, 129-132 (1941). (Spanish) (Scherk) 3-253.
- Verallgemeinerung eines Satzes von T. Kubota über Eiliniën. *Tôhoku Math. J.* 48, 64-67 (1941). (Scherk) 4-112.
- Verallgemeinerung eines Satzes von T. Kubota über Eiliniën. *Tôhoku Math. J.* 48, 64-67 (1941). (Jackson) 7-474.
- Beweis eines Satzes von Bottema über Eiliniën. *Tôhoku Math. J.* 48, 221-224 (1941). (Fenchel) 10-395.
- Integral formulas in Crofton's style on the sphere and some inequalities referring to spherical curves. *Duke Math. J.* 9, 707-722 (1942). (Scherk) 4-252.
- Isaac Newton and the binomial theorem. *Math. Notae* 2, 61-72 (1942). (Spanish) 4-65.
- On the concept of curvature of a surface. *Math. Notae* 2, 165-184 (1942). (Spanish) (Scherk) 4-257.
- Quelques propriétés des courbes gauches dans la géométrie différentielle affine. *Portugaliae Math.* 3, 63-68 (1942). (Scherk) 3-187.
- Supplement to the note: A theorem on sets of parallelepipeds with parallel edges. *Publ. Inst. Mat. Univ. Nac. Litoral* 3, 202-210 (1942). (Spanish, English summary) (Scherk) 4-112.
- On certain varieties of the type of a developable in Euclidean space of four dimensions. *Publ. Inst. Mat. Univ. Nac. Litoral* 4, 3-42 (1942). (Spanish) (Dorroh) 4-170.
- Some mean values and inequalities relating to curves on the sphere. *Revista Unión Mat. Argentina* 8, 113-125 (1942). (Spanish) (Scherk) 4-169.
- An integral formula concerning convex figures. *Revista Unión Mat. Argentina* 8, 165-169 (1942). (Spanish) (Scherk) 4-169.
- On the isoperimetric inequality for surfaces of constant negative curvature. *Univ. Nac. Tucumán. Revista A.* 3, 243-259 (1942). (Spanish) (Green) 5-154.
- Integral geometry on surfaces of constant negative curvature. *Duke Math. J.* 10, 687-709 (1943). (Scherk) 5-154.
- Some inequalities between the elements of a triangle. *Math. Notae* 3, 65-73 (1943). (Spanish) 5-73.
- A characteristic property of the circle. *Math. Notae* 3, 142-147 (1943). (Spanish) (Scherk) 5-154.
- On the probable distribution of corpuscles in a body, derived from their distribution in its cross-sections, and similar problems. *Revista Unión Mat. Argentina* 9, 145-164 (1943). (Spanish) (Scherk) 5-206.
- On the probable distribution of corpuscles in a body, deduced from the distribution of its sections, and analogous problems. *Revista Unión Mat. Argentina* 9, 145-164 (1943). (Spanish) (Feller) 8-170.
- Bounds for the length of a curve or for the number of points necessary for an approximate covering of a domain. *Anais Acad. Brasil. Ci.* 16, 111-121 (1944). (Spanish) (Scherk) 6-122.
- Note on convex spherical curves. *Bull. Amer. Math. Soc.* 50, 528-534 (1944). (Scherk) 6-100.
- Properties of convex figures on a sphere. *Math. Notae* 4, 11-40 (1944). (Spanish) (Scherk) 6-15.
- Area bounded by the curve generated by the end of a segment whose other end traces a fixed curve, and application to the derivation of some theorems on ovals. *Math. Notae* 4, 213-226 (1944). (Spanish) (Scherk) 7-25.
- Origin and development of integral geometry. *Revista Univ. Católica Perú* 12, 205-230 (1944). (Spanish) 7-169.
- Some properties of skew curves in projective differential geometry. *Actas Acad. Ci. Lima* 8, 203-216 (1945). (Spanish) (Vincensini) 8-91.
- Geometric probabilities and integral geometry. *Bol. Fac. Ingen. Montevideo* 3, (Año 10), 91-113 (1945). (Spanish) 7-474.
- Note on convex curves on the hyperbolic plane. *Bull. Amer. Math. Soc.* 51, 405-412 (1945). (Scherk) 7-26.
- A theorem on conformal mapping. *Math. Notae* 5, 29-40 (1945). (Spanish) (Beckenbach) 6-261.
- Addendum to the note "On a Diophantine problem." *Math. Notae* 5, 162-171 (1945). (Spanish) (Kaplansky) 7-242.
- Surfaces whose D-curves are geodesics or isogonal trajectories of the lines of curvature. *Publ. Inst. Mat. Univ. Nac. Litoral* 5, 255-267 (1945). (Spanish) (Busemann) 7-172.
- Mean value of the number of regions into which a body in space is divided by n arbitrary planes. *Revista Unión Mat. Argentina* 10, 101-108 (1945). (Spanish) (Scherk) 7-26.
- On the circle of maximum radius contained in a domain. *Revista Unión Mat. Argentina* 10, 155-162 (1945). (Spanish) (Scherk) 7-168.
- Convex regions on the n -dimensional spherical surface. *Ann. of Math.* (2) 47, 448-459 (1946). (Blanc) 8-170.
- A geometrical characterization for the affine differential invariants of a space curve. *Bull. Amer. Math. Soc.* 52, 625-632 (1946). (A. Schwartz) 8-91.
- On a line complex related to a closed space curve. *Math. Notae* 6, 45-56 (1946). (Spanish) (MacColl) 8-91.
- On the length of a space curve as mean value of the lengths of its orthogonal projections. *Math. Notae* 6, 158-166 (1946). (Spanish) (Busemann) 8-339.
- On the convex bodies of constant width in E_n . *Portugaliae Math.* 5, 195-201 (1946). (Spanish) (Busemann) 9-526.
- Some integral formulas referring to convex bodies. *Revista Unión Mat. Argentina* 12, 78-87 (1946). (Spanish) (Busemann) 9-526.
- On the measure of the set of congruent convex figures contained in the interior of a rectangle or of a triangle. *Actas Acad. Ci. Lima* 10, 103-116 (2 plates) (1947). (Spanish) (Busemann) 9-459.
- On the first two moments of the measure of a random set. *Ann. Math. Statistics* 18, 37-49 (1947). (Feller) 8-389.
- Affine invariants of certain pairs of curves and surfaces. *Duke Math. J.* 14, 559-574 (1947). (A. Schwartz) 9-201.
- A characteristic property of the quadrics of revolution and of the cylinders whose cross section is a logarithmic spiral. *Math. Notae* 7, 81-90 (1947). (Spanish) (Vincensini) 9-529.
- D curves on cones. *Math. Notae* 7, 179-190 (1947). (Spanish) (Vincensini) 10-209.
- An affine invariant for closed convex plane curves. *Math. Notae* 8, 103-111 (1948). (Spanish) (Busemann) 11-456.
- On the distribution of planes in space. *Revista Unión Mat. Argentina* 13, 120-124 (1948). (Spanish) (Busemann) 10-321.
- On plane hyperconvex figures. *Summa Brasil. Math.* 1 (1946), no. 11, 221-239 (1948). (Spanish, English summary) (Busemann) 10-141.
- Integral geometry on surfaces. *Duke Math. J.* 16, 361-375 (1949). (Allendoerfer) 10-732.
- Some inequalities between the elements of a tetrahedron in non-Euclidean geometry. *Math. Notae* 9, 113-117 (1949). (Spanish) (L. C. Young) 12-629.
- An affine invariant for convex bodies of n -dimensional space. *Portugaliae Math.* 8, 155-161 (1949). (Spanish) (Busemann) 12-526.

Integral geometry in projective and affine spaces. *Ann. of Math.* (2) 51, 739-755 (1950). (Allendoerfer) 11-681.

Integral geometry in three-dimensional spaces of constant curvature. *Math. Notae* 9 (1949), 1-28 (1950). (Spanish) (H. Busemann) 17-999.

On parallel hypersurfaces in the elliptic and hyperbolic n -dimensional space. *Proc. Amer. Math. Soc.* 1, 325-330 (1950). (Allendoerfer) 12-124.

On some integral formulas and mean values concerning movable convex figures in the plane. *Univ. Buenos Aires. Contrib. Ci. Ser. A.* 1, 23-45 (1950). (Spanish) (Busemann) 13-865.

Some integral formulas and a definition of q -dimensional area for a set of points. *Univ. Nac. Tucumán. Revista A.* 7, 271-282 (1950). (Spanish, English summary) (L. C. Young) 12-686.

Probability in geometrical constructions. *An. Soc. Ci. Argentina* 152, 203-229 (1951). (Spanish) (Blackwell) 14-59.

On pairs of convex figures. *Gaz. Mat.*, Lisboa 12, no. 50, 7-10 (1951). (Spanish) (Gale) 14-788.

Two characteristic properties of circles on a spherical surface. *Math. Notae* 11, 73-78 (1951). (Spanish) (J. W. Green) 14-495.

On permanent vector-varieties in n dimensions. *Portugaliae Math.* 10, 125-127 (1951). (Synge) 13-774.

Generalization of an inequality of H. Hornich to spaces of constant curvature. *Revista Unión Mat. Argentina* 15, 62-66 (1951). (Spanish) (Busemann) 13-768.

Integral geometry in general spaces. *Proceedings of the International Congress of Mathematicians*, Cambridge, Mass., 1950, vol. 1, pp. 483-489. *Amer. Math. Soc.*, Providence, R.I., 1952. (Chern) 13-377.

Problems of integral geometry. *Symposium sobre algunos problemas matemáticos que se están estudiando en Latino América*, Diciembre, 1951, pp. 23-40. *Centro de Cooperación Científica de la Unesco para América Latina*, Montevideo, Uruguay, 1952. (Spanish) 14-577.

Integral geometry in Hermitian spaces. *Amer. J. Math.* 74, 423-434 (1952). (Varga) 13-971.

Some mean values on the hemisphere. *Math. Notae* 12-13, 32-37 (1952). (Spanish) (L. C. Young) 14-788.

Integral geometry in spaces of constant curvature. *Repub. Argentina. Publ. Comisión Nac. Energía Atómica. Ser. Mat.* 1, no. 1, 68 pp. (1952). (Spanish, English summary) (Chern) 14-496.

Measure of sets of geodesics in a Riemannian space and applications to integral formulas in elliptic and hyperbolic spaces. *Summa Brasil. Math.* 3, 1-11 (1952). (Busemann) 15-58.

Introduction to integral geometry. *Actualités Sci. Ind.*, no. 1198 = *Publ. Inst. Math. Univ. Nancago II. Hermann et Cie.*, Paris, 1953. 127 pp. (Busemann) 15-736.

Correction to the article "On pairs of convex figures". *Gaz. Mat.*, Lisboa 14, no. 54, 6 (1953). (Spanish) 14-788.

Algebraic curves and analytic curves. *Univ. Nac. Eva Peron Publ. Fac. Ci. Fisicomat. Serie Segunda. Revista* 4, 493-506 (1953). (Spanish) (Blaschke) 15-737.

Questions of the affine differential geometry of surfaces. *Segundo symposium sobre algunos problemas matemáticos que se están estudiando en Latino América*, Julio, 1954, pp. 21-33. *Centro de Cooperación Científica de la UNESCO para América Latina*, Montevideo, Uruguay, 1954. (Spanish) (C. B. Allendoerfer) 17-186.

Some generalizations of the four-vertex theorem. *Math. Notae* 12-13, 69-78 (1954). (Spanish) (Scherk) 16-622.

On a theorem of Holditch and analogues in non-Euclidean geometry. *Math. Notae* 14, 32-49 (1954). (Spanish) (H. Busemann) 17-78.

Generalization of a geometric inequality of Feller. *Revista Unión Mat. Argentina* 16, 78-81 (1954). (Spanish, English summary) (Busemann) 16-508.

On some tensors analogous to that of curvature in spaces with a nonsymmetrical affine connection. *Univ. Nac. Tucumán. Rev. Ser. A.* 10, 19-26 (1954). (Spanish, English summary) (Hlavatý) 16-956.

Questions of differential and integral geometry in spaces of constant curvature. *Univ. e Politec. Torino. Rend. Sem. Mat.* 14 (1954-55), 277-295. (Spanish) (C. B. Allendoerfer) 17-656.

On geometry of numbers. *J. Math. Soc. Japan* 7, 208-213 (1955). (C. A. Rogers) 17-1059.

On the distribution of sizes of particles contained in a body given the distribution in its sections or projections. *Trabajos Estadíst.* 6 (1955), 181-196. (Spanish, English summary) (H. P. Mulholland) 17-1124.

Sur la mesure des espaces linéaires qui coupent un corps convexe et problèmes qui s'y rattachent. *Colloque sur les questions de réalité en géométrie*, Liège, 1955, pp. 177-190. *Georges Thone, Liège; Masson & Cie, Paris*, 1956. (S. Chern) 17-888.

Vvedenie v integral'nyu geometriyu. [Introduction to integral geometry.] *Izdat. Inostr. Lit.*, Moscow, 1956. 184 pp. 18-757.

Curves on a surface which are extremals of a function of the curvature and the torsion. *Abh. Math. Sem. Univ. Hamburg* 20 (1956), 216-222. (Spanish) (C. B. Allendoerfer) 18-505.

On the uniqueness of elementary vector operators. *Math. Notae* 14 (1955), 120-132 (1956). (Spanish) (J. H. Williamson) 19-763.

On the chords of a convex curve. *Rev. Un. Mat. Argentina* 17 (1955), 217-222 (1956). (Spanish) (H. Busemann) 18-594.

Affine differential geometry and convex bodies. *Math. Notae* 16 (1957), 20-42. (Spanish) 20 #6713.

On the mean curvatures of a flattened convex body. *Rev. Fac. Sci. Univ. Istanbul. Sér. A.* 21 (1956), 189-194 (1957). (Turkish summary) (W. Fenchel) 20 #2667.

Some properties of the local conformal representation of one surface on another. *Rev. Un. Mat. Argentina* 18 (1957), 45-52. (Spanish, English summary) (C. Longo) 20 #293.

Šantavý, Ivan.

The radiation of an electric dipole near the boundary between two media. *Čehoslovack. Fiz. Ž.* 5 (1955), 340-368. (Russian, English summary) (R. N. Goss) 17-433.

On arithmetical properties of singular cubic surfaces. J. London Math. Soc. 19, 84-91 (1944). (Walker) 7-52.

On arithmetical properties of quadric and quartic surfaces. J. London Math. Soc. 19, 195-200 (1944). (Niven) 7-244.

On the quartic surface $x_1^4 + x_2^4 + x_3^4 + x_4^4 = 0$. Proc. Cambridge Philos. Soc. 40, 121-145 (1944). (Walker) 6-102.

A remark on unicursal curves lying on the general quartic surface. Quart. J. Math., Oxford Ser. 15, 24-25 (1944). 6-16.

A four-dimensional analogue of Pascal's theorem for conics. Amer. Math. Monthly 52, 119-131 (1945). (Coxeter) 6-215.

The algebraic equations of degrees 5, 9, 157, ..., and the arithmetic upon an algebraic variety. Ann. of Math. (2) 46, 287-301 (1945). (Walker) 7-108.

Arithmetic upon an algebraic surface. Bull. Amer. Math. Soc. 51, 152-161 (1945). (Walker) 6-185.

Lattice points in infinite domains, and asymmetric Diophantine approximations. Duke Math. J. 12, 337-365 (1945). (Derry) 6-258.

The biaxial surfaces, and the equivalence of binary forms. Proc. Cambridge Philos. Soc. 41, 187-209 (1945). (Walker) 7-169.

Gruppi misti, ed orientazioni in geometria proiettiva differenziale. Ann. Mat. Pura Appl. (4) 25, 313-324 (1946). (Schouten) 9-615.

Un'estensione delle varietà di Veronese, ed un principio di dualità per forme algebriche. I. Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat. (8) 1, 313-318 (1946). (J. A. Todd) 8-341.

Un'estensione delle varietà di Veronese, ed un principio di dualità per forme algebriche. II. Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat. (8) 1, 559-563 (1946). (J. A. Todd) 8-341.

Sui sistemi continui di ipersuperficie algebriche. Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat. (8) 1, 564-570 (1946). (J. A. Todd) 8-341.

Geometria algebrica nei paesi anglo-sassoni (dal 1939 al 1945). Pont. Acad. Sci. Relationes Auctis Sci. Temp. Belli 11, 52 pp. (1946). 9-608.

On tac-invariants of two curves in a projective space. Quart. J. Math., Oxford Ser. 17, 35-38 (1946). (Wilkins) 7-393.

Equivalenza ed automorfismi delle forme binarie in un dato anello o camponumerico. Univ. Nac. Tucumán. Revista A. 5, 7-68 (1946). (R. J. Walker) 9-170.

Sui teoremi di Bézout, Jacobi e Reiss. Ann. Mat. Pura Appl. (4) 26, 1-26 (1947). (Seidenberg) 10-397.

Caratterizzazione geometrica degli integrali abeliani e dei loro residui. I, II. Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat. (8) 3, 167-172, 172-179 (1947). (Schilling) 9-527.

Un nuovo metodo per lo scioglimento delle singolarità. Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat. (8) 3, 411-414 (1947). (R. J. Walker) 10-322.

Gli automorfismi del corpo complesso, ed un problema di Corrado Segre. Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat. (8) 3, 414-420 (1947). (Moufang) 10-231.

Una nuova caratterizzazione della sfera. Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat. (8) 3, 420-422 (1947). (Fenchel) 10-208.

Sulla torsione integrale delle curve chiuse sgembe. Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat. (8) 3, 422-426 (1947). (Fenchel) 10-208.

Sul contatto di due varietà. Boll. Un. Mat. Ital. (3) 2, 12-16 (1947). (Vanderslice) 9-157.

Sul massimo numero di nodi delle superficie di dato ordine. Boll. Un. Mat. Ital. (3) 2, 204-212 (1947). (Du Val) 9-608.

On arithmetical properties of quartic surfaces. Proc. London Math. Soc. (2) 49, 353-395 (1947). (R. J. Walker) 9-135.

Lezioni di Geometria Moderna. Vol. I. Fondamenti di Geometria Sopra un Corpo Quallsiasi. Nicola Zanichelli, Bologna, 1948. iv + 195 pp. (Scott) 10-729.

Trasporti rigidi di vettori, e geometria della retta. Ann. Mat. Pura Appl. (4) 27, 267-272 (1948). (Vanderslice) 11-34.

Sulle irrazionalità da cui può farsi dipendere la determinazione di S_K appartenenti a varietà intersezioni complete di forme. Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat. (8) 4, 149-154 (1948). (R. Brauer) 10-231.

Intorno agli S_K che appartengono alle forme generali di dato ordine. I. Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat. (8) 4, 261-265 (1948). (Seidenberg) 10-207.

Intorno agli S_K che appartengono alle forme generali di dato ordine. II. Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat. (8) 4, 341-346 (1948). (Seidenberg) 10-566.

Proprietà algebriche ed aritmetiche di forme cubiche. I. Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat. (8) 4, 346-352 (1948). (R. J. Walker) 10-510.

Proprietà algebriche ed aritmetiche di forme cubiche. II. Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat. (8) 4, 509-515 (1948). (R. J. Walker) 10-510.

Proprietà algebriche ed aritmetiche di forme cubiche. III. Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat. (8) 4, 629-632 (1948). (R. J. Walker) 10-511.

Proprietà algebriche ed aritmetiche di forme cubiche. IV. Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat. (8) 5, 3-11 (1948). (R. J. Walker) 10-511.

Intorno ad un problema del Lebesgue sui gruppi di punti associati. Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat. (8) 5, 187-192 (1948). (Gauthier) 11-206.

Sulle V_n contenenti più di $\infty^{n-K_{S_K}}$. I. Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat. (8) 5, 193-197 (1948). (Conforto) 12-49.

Sulle V_n contenenti più di $\infty^{n-K_{S_K}}$. II. Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat. (8) 5, 275-280 (1948). (Conforto) 12-49.

Osservazioni sulle involuzioni piane più volte infinite. Boll. Un. Mat. Ital. (3) 3, 196-200 (1948). (Gauthier) 10-566.

Corrispondenze analitiche e trasformazioni cremoniane. Ann. Mat. Pura Appl. (4) 28, 107-139 (1949). (Bompliani) 12-200.

Geometria dello spazio fisico. Archimede 1, 73-81 (1949). 10-500.

Alcune proprietà caratteristiche delle varietà a curvatura costante. I. Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat. (8) 6, 393-397 (1949). (Vanderslice) 11-541.

Alcune proprietà caratteristiche delle varietà a curvatura costante. II. Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat. (8) 6, 547-550 (1949). (Vanderslice) 11-541.

Alcune proprietà caratteristiche delle varietà a curvatura costante. III. Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat. (8) 6, 661-667 (1949). (Vanderslice) 11-541.

Alcune proprietà caratteristiche delle varietà a curvatura costante. IV. Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat. (8) 7, 12-15 (1949). (Vanderslice) 11-541.

Geometria non euclidea ed ottica geometrica. I. Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat. (8) 7, 16-19 (1949). (McConnell) 11-742.

Geometria non euclidea ed ottica geometrica. II. Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat. (8) 7, 20-26 (1949). (McConnell) 11-742.

Generalizzazione di un teorema di Beltrami. Boll. Un. Mat. Ital. (3) 4, 16-22 (1949). (Vanderslice) 10-736.

Le rette delle superficie cubiche nei corpi commutativi. Boll. Un. Mat. Ital. (3) 4, 223-228 (1949). (Scott) 11-537.

Séminaire Cartan (H.) (=Séminaire Cartan-Chevalley)

Séminaire de topologie algébrique de l'Ecole Normale Supérieure, 1948-49. Dix-sept exposés, avec pagination individuelle, par H. Cartan, J.-P. Serre, J. Cerf, P. Samuel, J. Dixmier, et J. Frenkel. 167 pp. (Hilton) 14-670.

Séminaire de topologie algébrique de l'Ecole Normale Supérieure, 1950-51. Exposés XIV-XX par H. Cartan et exposé XXI par J.-P. Serre. Avec un appendice de deux exposés de H. Cartan du Séminaire de topologie algébrique de l'Ecole Normale Supérieure, 1949-50. 98 + i + 29 pp. (Hilton) 14-670.

Séminaire H. Cartan de l'Ecole Normale Supérieure, 1951-52. Vingt exposés avec pagination individuelle par H. Cartan, P. Dolbeault, Jean Cerf, Jean Frenkel, Michel Hervé, F. Bruhat, Malatian et J. P. Serre. 274 pp. (miméographié) (Spencer) 16-233.

Séminaire H. Cartan de l'Ecole Normale Supérieure, 1953/1954. Fonctions automorphes. Exposés de J.-P. Serre, 24-5-54 et 14-6-54. 25 pp. (R. C. Gunning) 19-577.

Séminaire Henri Cartan de l'Ecole Normale Supérieure, 1948/1949. Topologie algébrique. 2ème éd. Secrétariat mathématique, 11 rue Pierre Curie, Paris, 1955. iii + 86 pp. (polycopiées). 17-69.

Séminaire Henri Cartan de l'Ecole Normale Supérieure, 1950/1951. Cohomologie des groupes, suite spectrale, faisceaux. 2e éd. Secrétariat mathématique, 11 rue Pierre Curie, Paris, 1955. 188 pp. (P. Hilton) 17-1117.

Séminaires de H. Cartan, 1953-1954. Chapters XVI-XIX and Séminaire Bourbaki. Mathematics Department, Massachusetts Institute of Technology, Cambridge, Mass., 1955. 44 pp. (P. E. Conner) 18-69.

Séminaire Henri Cartan de l'Ecole Normale Supérieure, 1954/1955. Algèbres d'Eilenberg-MacLane et homotopie. Secrétariat mathématique, 11 rue Pierre Curie, Paris, 1955. i + 234 pp. (polycopiées). (E. Burger) 19-438.

Séminaire Henri Cartan de l'Ecole Normale Supérieure, 1949/1950. Espaces fibrés et homotopie. 18 exposés par Blanchard, A.; Borel, A.; Cartan, H.; Serre, J. P.; and Wen Tsün, Wu. 2ème éd. Secrétariat mathématique, 11 rue Pierre Curie, Paris, 1956. iii + 149 pp. (W. S. Massey) 18-409.

Séminaire Henri Cartan de l'Ecole Normale Supérieure, 1954/1955. Algèbres d'Eilenberg-Mac Lane et homotopie. 2ème éd. Secrétariat mathématique, 11 rue Pierre Curie, Paris, 1956. iii + 234 pp. (polycopiées). 19-439.

Séminaire H. Cartan et C. Chevalley, 8e année: 1955/1956. Géométrie algébrique. Secrétariat mathématique, 11 rue Pierre Curie, Paris, 1956. ii + 173 pp. (polycopiées) (P. Abellanas) 20 #3871.

Séminaire Châtelet-Dubreil. See Séminaire Dubreil.

Séminaire de Broglie (L.)

Séminaire de théories physiques dirigé par Louis de Broglie, 25e année: 1955/56. Secrétariat mathématique, 11 rue Pierre Curie, Paris, 1956. ii + 145 pp. (polycopiées) 19-1230.

Séminaire de topologie algébrique de l'Ecole Normale Supérieure, 1948-1949; 1950-51. See Séminaire Cartan.

Séminaire Dubreil (P.) (=Séminaire Dubreil-Pisot; Séminaire Châtelet-Dubreil)

Séminaire d'algèbre et de théorie des nombres dirigé par A. Châtelet et P. Dubreil, 1953/1954. Vingt conférences avec pagination individuelle par F. Châtelet, R. Croisot, J. Guérindon, P. Jaffard, M. Lazard, L. Lesieur, J. Petresco, G. Poitou, J. Riguet, P. Samuel, Mlle. M. Teissier, R. Thibault, et G. Thierrin. Faculté des Sciences de Paris, Paris, 1954. 189 pp. (polycopiées) (L. J. Paige) 16-1082.

Séminaire P. Dubreil de la Faculté des Sciences de Paris, 1954/1955. Algèbre et théorie des nombres. Secrétariat mathématique, 11 rue Pierre Curie, Paris, 1955. iii + 166 pp. (polycopiées). (Marshall Hall, Jr.) 17-451.

Séminaire A. Châtelet et P. Dubreil de la Faculté des Sciences de Paris, 1953/1954. Partie complémentaire: Demi-groupes. 9 exposés par Croisot, R.; Riguet, J.; Teissier, Mlle. M.; Thibault, R.; et Thierrin, G. 2e tirage multigraphié. Secrétariat mathématique, 11 rue Pierre Curie, Paris, 1956. ii + 84 pp. (H. Campaigne) 18-282.

Séminaire Paul Dubreil et Charles Pisot, 9e année: 1955/56. Algèbre et théorie des nombres. Secrétariat mathématique, 11 rue Pierre Curie, Paris, 1956. ii + 213 pp. (polycopiées) (Marshall Hall, Jr.) 19-522.

Séminaire Kahan (T.)

Séminaire Théo Kahan, 3e année: 1955/1956. Physique des ondes. Secrétariat mathématique, 11 rue Pierre Curie, Paris, 1956. ii + 161 pp. (polycopiées) (R. S. Phillips) 19-503.

Séminaire Krasner (M.)

Séminaire M. Krasner de la Faculté des Sciences de Paris, 1953/1954. Théorie des corps valués. Vol. 1 [Exposés nos. 1-4]. Secrétariat mathématique, 11 rue Pierre Curie, Paris, 1956. 52 + 25 + 46 + 39 pp. (multigraphiées) (P. Abellanas) 20 #3858.

Séminaire M. Krasner de la Faculté des Sciences de Paris, 1953/1954. Théorie des corps valués. Vol. 2 [Exposé no. 5]. Secrétariat mathématique, 11 rue Pierre Curie, Paris, 1956. 131 pp. (multigraphiées) (P. Abellanas) 20 #3859.

Séminaire Schwartz.

Séminaire Schwartz de la Faculté des Sciences de Paris, 1953/54. Produits tensoriels topologiques d'espaces vectoriels topologiques. Espaces vectoriels topologiques nucléaires. Applications. Secrétariat mathématique, 11 rue Pierre Curie, Paris, 1954. iii + 144 pp. (polycopiées). (J. Sebastião e Silva) 17-764.

Séminaire Schwartz de la Faculté des Sciences de Paris, 1954/1955. Equations aux dérivées partielles. Secrétariat mathématique, 11 rue Pierre Curie, Paris, 1955. 115 pp. (polycopiées). (P. D. Lax) 19-279.

Séminaire Schwartz de la Faculté des Sciences de Paris, 3e année: 1955/1956. Problèmes mixtes pour l'équation des ondes. Secrétariat mathématique, 11 rue Pierre Curie, Paris, 1956. ii + 30 pp. (polycopiées) (J. Sebastião e Silva) 19-418.

Séminaire "Sophus Lie"

Séminaire "Sophus Lie" de l'Ecole Normale Supérieure, 1954/1955. Théorie des algèbres de Lie. Topologie des groupes de Lie. Secrétariat mathématique, 11 rue Pierre Curie, Paris, 1955. 200 pp. (polycopiées). (G. Hochschild) 17-384.

Séminaire "Sophus Lie" de la Faculté des Sciences de Paris, 1955-56. Hyperalgèbres et groupes de Lie formels. Secrétariat mathématique, 11 rue Pierre Curie, Paris, 1957. 61 pp. (multigraphiées) (J. Dieudonné) 19-431.

Problème mixte de la théorie du potentiel et de la théorie de l'élasticité pour un plan ayant un nombre fini de coupures rectilignes. C. R. (Doklady) Acad. Sci. URSS (N. S.) 27, 329-333 (1940). (Bergmann) 2-270.
Sur un problème de la théorie de l'élasticité. C. R. (Doklady) Acad. Sci. URSS (N. S.) 27, 907-910 (1940). (Bergmann) 3-29.
Sur la solution du premier problème fondamental de la théorie de l'élasticité plane statique. C. R. (Doklady) Acad. Sci. URSS (N. S.) 27, 911-913 (1940). (Bergmann) 2-270.
Sur la solution du second problème fondamental de la théorie statique plane de l'élasticité. C. R. (Doklady) Acad. Sci. URSS (N. S.) 28, 25-27 (1940). (Bergmann) 2-270.
Problème mixte de la théorie statique de l'élasticité pour les domaines plans multiplement connexes. C. R. (Doklady) Acad. Sci. URSS (N. S.) 28, 28-31 (1940). (Bergmann) 2-270.
Une remarque concernant le problème de Dirichlet. C. R. (Doklady) Acad. Sci. URSS (N. S.) 29, 286-287 (1940). (Green) 2-292.
Sur les tensions dans une plaque elliptique. C. R. (Doklady) Acad. Sci. URSS (N. S.) 31, 313-314 (1941). (Bergmann) 3-30.
Une nouvelle solution du problème plan de la théorie de l'élasticité pour un milieu anisotrope. C. R. (Doklady) Acad. Sci. URSS (N. S.) 32, 314-315 (1941). (Bergman) 6-250.
Sur la réduction d'une classe de problèmes à l'équation intégrale de Fredholm. C. R. (Doklady) Acad. Sci. URSS (N. S.) 32, 603-605 (1941). (Trjitzinsky) 5-243.
On the solution of a plane problem of the theory of elasticity for an isotropic medium. Appl. Math. Mech. [Akad. Nauk SSSR. Prikl. Mat. Mech.] 6, 509-514 (1942). (Russian, English summary) (S. Bergman) 5-82.
Plane deformation in isotropic inhomogeneous media. Appl. Math. Mech. [Akad. Nauk SSSR. Prikl. Mat. Mech.] 7, 301-309 (1943). (Russian, English summary) (Bergman) 6-138.
A spatial static problem of the elasticity theory with given displacement on the boundary. Appl. Math. Mech. [Akad. Nauk SSSR. Prikl. Mat. Mech.] 7, 341-360 (1943). (Russian, English summary) (Weinstein) 6-250.
A mixed problem of the elasticity theory. Appl. Math. Mech. [Akad. Nauk SSSR. Prikl. Mat. Mech.] 7, 413-420 (1943). (Russian, English summary) (Bergman) 6-195.
On the propagation of waves in a fluid layer covering an elastic half-space. Acad. Sci. URSS. Publ. [Trudy] Inst. Séismolog. no. 115, 43 pp. (1945). (Russian) (Kostitzin) 10-655.
Stresses in an anisotropic elastic homogeneous medium formed by flush fitting of bodies. Appl. Math. Mech. [Akad. Nauk SSSR. Prikl. Mat. Mech.] 9, 347-352 (1945). (Russian, English summary) (Sokolnikoff) 7-351.
Certain problems of the theory of potential. Appl. Math. Mech. [Akad. Nauk SSSR. Prikl. Mat. Mech.] 9, 479-488 (1945). (Russian, English summary) (Golomb) 9-143.
On the reduction of the plane problem of the theory of potential to an integral equation. Bull. Acad. Sci. URSS. Sér. Math. [Izvestia Akad. Nauk SSSR] 9, 357-362 (1945). (Russian, English summary) (Beckenbach) 8-66.
On some problems of the theory of stationary oscillations. Bull. Acad. Sci. URSS. Sér. Math. [Izvestia Akad. Nauk SSSR] 9, 363-370 (1945). (Russian, English summary) (Beckenbach) 8-66.
On diffraction of elastic waves. C. R. (Doklady) Acad. Sci. URSS (N. S.) 48, 626-629 (1945). (Trjitzinsky) 8-120.
On Poincaré's problem in the theory of potential. C. R. (Doklady) Acad. Sci. URSS (N. S.) 49, 636-639 (1945). (Brelot) 8-66.
Oscillation du demi-espace élastique aux déplacements ou aux forces extérieures données à la frontière. Acad. Sci. URSS. Publ. [Trudy] Inst. Séismolog. no. 118, 47 pp. (1946). (Russian) (Sokolnikoff) 8-361.
Steady elastic oscillations in the case of given displacements on the boundary of the medium. Appl. Math. Mech. [Akad. Nauk SSSR. Prikl. Mat. Mech.] 10, 617-622 (1946). (Russian, English summary) (Doyle) 8-361.
On the general problem of the potential theory. Bull. Acad. Sci. URSS. Sér. Math. [Izvestia Akad. Nauk SSSR] 10, 121-134 (1946). (Russian, English summary) (Brelot) 8-66.
On the Dirichlet and Neuman problems in the theory of steady oscillations. Appl. Math. Mech. [Akad. Nauk SSSR. Prikl. Mat. Mech.] 11, 259-266 (1947). (Russian, English summary) (Beckenbach) 9-121.
Sur une méthode de résoudre certains problèmes de la théorie de l'élasticité pour les domaines doublement connexes. C. R. (Doklady) Acad. Sci. URSS (N. S.) 55, 697-700 (1947). (Sokolnikoff) 9-121.
On certain cases of the general problem of the theory of steady state vibrations. Doklady Akad. Nauk SSSR (N. S.) 56, 567-570 (1947). (Russian) (Beckenbach) 9-287.
On certain spatial problems of potential theory. Akad. Nauk SSSR. Prikl. Mat. Meh. 12, 329-338 (1948). (Russian) (Beckenbach) 10-297.
On methods of solving certain singular integral equations. Akad. Nauk SSSR. Prikl. Mat. Meh. 12, 423-452 (1948). (Russian) (Trjitzinsky) 10-305.
On a case in the theory of singular equations. Doklady Akad. Nauk SSSR (N. S.) 59, 647-650 (1948). (Russian) (Trjitzinsky) 9-442.
On a problem of torsion. Doklady Akad. Nauk SSSR (N. S.) 63, 499-502 (1948). (Russian) (Sokolnikoff) 10-651.
On Prandtl's equation in the theory of a wing of finite span. Izvestiya Akad. Nauk SSSR. Otd. Tehn. Nauk 1948, 595-600 (1948). (Russian) (Thielman) 10-76.
On the state of stress in some shrink-fitted members. Izvestiya Akad. Nauk SSSR. Otd. Tehn. Nauk 1948, 1371-1388 (1948). (Russian) (Sokolnikoff) 10-650.
On the theory of steady oscillations of a medium under given exterior forces on its boundary. Akad. Nauk SSSR. Prikl. Mat. Meh. 13, 557-560 (1949). (Russian) (Thielman) 11-252.
Torsion of an elliptic cylinder stiffened with a circular rod. Akad. Nauk SSSR. Inženernyĭ Sbornik 10, 81-108 (1951). (Russian) (Sokolnikoff) 15-372.
On a case of regularization of singular equations. Akad. Nauk SSSR. Prikl. Mat. Meh. 15, 75-82 (1951). (Russian) (Trjitzinsky) 12-832.

- On the stresses in a heavy half-plane weakened by two circular openings. *Akad. Nauk SSSR. Prikl. Mat. Meh.* 15, 297-316 (1951). (Russian) (Sokolnikoff) 13-184.
- On stresses in a plane heavy medium with two identical symmetrically placed circular openings. *Akad. Nauk SSSR. Prikl. Mat. Meh.* 15, 751-761 (1951). (Russian) (Sokolnikoff) 15-371.
- On the stresses in a twisted circular beam weakened by a prismatic cavity. *Izvestiya Akad. Nauk SSSR Otd. Tehn. Nauk* 1951, 969-995 (1951). (Russian) (Sokolnikoff) 13-301.
- Bending by a transverse force of an elliptic beam weakened by a longitudinal circular cylindrical cavity. *Akad. Nauk SSSR. Inženernyĭ Sbornik* 17, 121-150 (1953). (Russian) (Radok) 16-645.
- On properties of infinite systems of equations in problems of torsion of certain doubly connected profiles. *Akad. Nauk SSSR. Prikl. Mat. Meh.* 17, 470-476 (1953). (Russian) (Sokolnikoff) 15-232.
- On a connection of the fundamental problem of the theory of elasticity with a singular case of a problem of Poincaré. *Akad. Nauk SSSR. Prikl. Mat. Meh.* 17, 685-692 (1953). (Russian) (Sokolnikoff) 15-703.
- On a singular problem from potential theory. *Doklady Akad. Nauk SSSR (N. S.)* 94, 25-28 (1954). (Russian) (Trjitzinsky) 15-792.
- On the bending of a circular plate partly clamped and partly supported on the contour. *Dokl. Akad. Nauk SSSR (N. S.)* 101, 623-626 (1955). (Russian) (I. S. Sokolnikoff) 17-104.
- On the bending of a circular plate, partly supported and partly free on the contour. *Dokl. Akad. Nauk SSSR (N. S.)* 105 (1955), 1180-1183. (Russian) (R. C. T. Smith) 18-163.
- Torsion of a circular cylinder stiffened with an elliptic bar. *Inžen. Sb.* 21, 79-96 (1955). (Russian) (I. S. Sokolnikoff) 17-318.
- On one method of solving torsion, bending and plane elasticity problems for multi-connected regions. *Akad. Nauk Ukrain. RSR. Prikl. Meh.* 3 (1957), 363-377. (Ukrainian, Russian and English summaries) 19-1210.
- On a problem in the theory of elasticity with mixed homogeneous conditions. *Dokl. Akad. Nauk SSSR (N. S.)* 114 (1957), 733-736. (Russian) (T. Leser) 19-1104.
- On elastic equilibrium of a plate supported at the edge. *Izv. Akad. Nauk Armyan. SSR. Ser. Fiz.-Mat. Nauk* 10 (1957), no. 3, 35-46. (Russian, Armenian summary) 19-1212.
- and Narodeckij, M. Z.
On the torsion of some prismatic hollow bodies. *Akad. Nauk SSSR. Inženernyĭ Sbornik* 6, 17-46 (1950). (Russian) (Leser) 13-886.

Una nuova visione della geometria sopra una curva. *Pont. Acad. Sci. Acta* 14, 143-152 (1951). (Italian, Latin summary) (Zariski) 14-80.

Le diverse concezioni di varietà nella geometria algebrica. *Rend. Accad. Naz. dei XL* (4) 2, 155-181 (1951). (Zariski) 14-1011.

I fondamenti remoti e prossimi della geometria algebrica. *Univ. e Politecnico Torino. Rend. Sem. Mat.* 10, 67-95 (1951). (Zariski) 14-2.

Complementi bibliografici ai "Fondamenti per la geometria sulle varietà algebriche: seconda memoria." *Ann. Mat. Pura Appl.* (4) 33, 1-3 (1952). 14-313.

Ulteriori complementi alla teoria della base. *Rend. Circ. Mat. Palermo* (2) 1, 71-87 (1952). (J. A. Todd) 14-80.

Funzioni analitiche e forme differenziali. *Atti del Quarto Congresso dell'Unione Matematica Italiana*, Taormina, 1951, vol. I, pp. 125-140. Casa Editrice Perrella, Roma, 1953. (Bochner) 14-1077.

Quelques problèmes se rapportant aux fonctions analytiques de plusieurs variables. *Colloque sur les fonctions de plusieurs variables*, tenu à Bruxelles, 1953, pp. 9-20. Georges Thone, Liège; Masson & Cie, Paris, 1953. (W. T. Martin) 15-521.

Un'osservazione sul limite d'applicabilità della formula di postulazione per una varietà algebrica. *Atti Accad. Ligure* 9 (1952), 23-28 (1953). (Scott) 15-154.

Geometria algebrica ed algebra astratta. *Rend. Sem. Mat. Fis. Milano* 23 (1952), 114-151 (1953). (Zariski) 16-163. Leonardo e la matematica. *Scientia* 88, 41-44 (1953). 14-832.

Sulla caratterizzazione dei corpi di funzioni quasi abeliane.

Convegno Internazionale di Geometria Differenziale, Italia, 1953, pp. 21-26. Edizioni Cremonese, Roma, 1954.

(Martinelli) 16-163.

Some remarks on the topological characterization of algebraic surfaces. *Studies in mathematics and mechanics presented to Richard von Mises*, pp. 54-61. Academic Press Inc., New York, 1954. (W. V. D. Hodge) 16-397.

Francesco Severi. *Accad. Naz. dei XL. Annuario Generale* 1953, 13-30 (1 plate) (1954). 15-592.

Aspetti matematici dei legami tra relatività e senso comune. *Cinquant'anni di Relatività, 1905-1955*, pp. 309-333. Editrice Universitaria, Firenze, 1955. 17-544.

Complementi alla teoria della base. *Ann. Mat. Pura Appl.* (4) 40 (1955), 1-14. (D. B. Scott) 17-1006.

Sugli antigeni d'una varietà algebrica. *Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat.* (8) 18 (1955), 131-140. (P. Samuel) 17-896.

Complementi alla teoria delle equivalenze sulle varietà algebriche: le equivalenze algebriche. *Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat.* (8) 18 (1955), 357-361. (P. Samuel) 17-896.

Complementi alla teoria delle equivalenze sulle varietà algebriche: le equivalenze razionali. *Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat.* (8) 18 (1955), 443-451. (P. Samuel) 17-896.

Sulla teoria degli integrali semplici di 3^a specie sopra una superficie o varietà algebrica. *Rend. Mat. e Appl.* (5) 14 (1955), 551-563. (D. B. Scott) 17-664.

Fonctions et variétés quasi-abéliennes. *Proceedings of the International Congress of Mathematicians, 1954, Amsterdam*, vol. III, pp. 521-528. Erven P. Noordhoff N. V., Groningen; North-Holland Publishing Co., Amsterdam, 1956. (M. Rosati) 20 #5205.

Problèmes résolus et problèmes nouveaux dans la théorie des systèmes d'équivalence. *Proceedings of the International Congress of Mathematicians, 1954, Amsterdam*, vol. III, pp. 529-541. Erven P. Noordhoff N. V., Groningen; North-Holland Publishing Co., Amsterdam, 1956. (M. Rosati) 20 #5206.

Osservazioni sui sistemi gruppi di equivalenza lineare e d'equivalenza algebrica per le ipersuperficie d'una varietà. *Abh. Math. Sem. Univ. Hamburg* 20 (1956), 127-135. (B. Segre) 18-673.

Fondamenti per la geometria sulle varietà algebriche. III. *Ann. Mat. Pura Appl.* (4) 41 (1956), 161-199. (J. A. Todd) 18-69.

Contributi alla teoria delle irregolarità d'una varietà algebrica. *Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat.* (8) 20 (1956), 7-16. (D. B. Scott) 18-69.

Les formes de première et de seconde espèces attachées à une variété algébrique. *C. R. Acad. Sci. Paris* 242 (1956), 59-61. (D. B. Scott) 17-664.

Les irrégularités d'une variété algébrique et leurs liens avec les formes de première espèce. *C. R. Acad. Sci. Paris* 242 (1956), 225-227. (D. B. Scott) 17-664.

Frammenti ricomposti e integrati. I. Le caratteristiche delle coniche nello spazio. *Rev. Un. Mat. Argentina* 17 (1955), 251-264 (1956). (E. Togliatti) 18-512.

On the symbol of virtual intersection of algebraic varieties. *Algebraic geometry and topology. A symposium in honor of S. Lefschetz*, pp. 157-166. Princeton University Press, Princeton, N. J., 1957. (M. Rosenlicht) 19-767.

Les irrégularités des variétés algébriques, et les systèmes adjoints. *C. R. Acad. Sci. Paris* 244 (1957), 2333-2336. (J. A. Todd) 18-458.

Obituary: Federigo Enriques. *Rend. Mat. e Appl.* (5) 16 (1957), 3-8. 19-1248.

Commemorazione del Prof. Luigi Fantappiè all'Istituto di Alta Matematica. *Rend. Mat. e Appl.* (5) 16 (1957), 140-142. 19-1248.

Alcune osservazioni sopra la caratterizzazione topologica

delle superficie algebriche. *Rend. Mat. e Appl.* (5) 16 (1957), 161-169. 19-1195.

Réflexions et problèmes sur la topologie des variétés algébriques. *Schr. Forschungsinst. Math.* 1 (1957), 235-244. 19-767.

Fondamenti per la geometria sulle varietà algebriche. Ulteriore contributo alla teoria delle irregolarità. *Rend. Accad. Naz. dei XL* (4) 8/9 (1957/58), 89-97. (J. A. Todd) 20 #6430.

Il teorema di Riemann-Roch per curve, superficie e varietà; questioni collegate. *Ergebnisse der Mathematik und ihrer Grenzgebiete. Neue Folge. Heft 17. Reihe: Algebraische Geometrie*. Springer-Verlag, Berlin-Göttingen-Heidelberg, 1958. viii + 131 pp. (B. Segre) 20 #875.

- The maximum term of an entire series. V. *J. Indian Math. Soc. (N.S.)* 13, 60-64 (1949). (Valiron) 11-508.
- The maximum term of an entire series. VII. *Ganita* 1, 82-85 (1950). (Boas) 13-452.
- The maximum term of an entire series. VI. *J. Indian Math. Soc. (N.S.)* 14, 21-28 (1950). (Boas) 12-249.
- On real continuous solutions of algebraic difference equations. II. *Proc. Nat. Inst. Sci. India* 16, 11-17 (1950). (Trjitzinsky) 12-105.
- The maximum term of an entire series. IV. *Quart. J. Math., Oxford Ser. (2)* 1, 112-116 (1950). (Boas) 12-16.
- On exceptional values of entire functions. *Compositio Math.* 9, 227-238 (1951). (Boas) 13-452.
- On the coefficients of an entire series of finite order. *J. London Math. Soc.* 26, 45-46 (1951). (Boas) 12-399.
- Some theorems on meromorphic functions. *Proc. Amer. Math. Soc.* 2, 694-698 (1951). (Valiron) 13-336.
- A note on means of entire functions. *Publ. Math. Debrecen* 2, 95-99 (1951). (Boas) 13-638.
- Exceptional values of entire and meromorphic functions. *Duke Math. J.* 19, 585-593 (1952). (Boas) 14-365.
- Note on eigenfunction expansions. *J. London Math. Soc.* 27, 58-64 (1952). (Langer) 13-844.
- A note on entire functions of perfectly regular growth. *Math. Z.* 56, 254-257 (1952). (Boas) 14-366.
- On a function of Ramanujan. *Amer. Math. Monthly* 63 (1956), 407-408. (B. Lépson) 18-22.
- Exceptional values of entire and meromorphic functions. II. *J. Indian Math. Soc. (N.S.)* 20 (1956), 315-327. (R. P. Boas, Jr.) 19-737.
- and Ishaq, M.
On the maximum modulus and the coefficients of an entire series. *J. Indian Math. Soc. (N.S.)* 16 (1952), 177-182 (1953). (Boas) 14-631.
- and Khanna, Girja.
On entire functions of infinite order. *Math. Student* 21, 47-48 (1953). (Korevaar) 15-207.

---- and Sharma, U. C.

Some properties of a function of Ramanujan. *J. Univ. Bombay (N.S.)* 17, part 3, sect. A, 1-4 (1948). (Pollard) 10-373.

---- and Singh, S. K.

Borel's theorem on α -points and exceptional values of entire and meromorphic functions. *Math. Z.* 59, 88-93 (1953). (Boas) 15-113.

On the maximum function of a meromorphic function. *Math. Student* 22, 121-128 (1954). (Boas) 16-459.

The maximum term of an entire series. *Proc. Roy. Soc. Edinburgh. Sect. A.* 64, 80-89 (1954). (Boas) 16-122.

On the derivative of a meromorphic function with maximum defect. *Math. Z.* 65 (1956), 171-174. (R. P. Boas, Jr.) 17-1193.

Note on a step function. *Quart. J. Math. Oxford Ser. (2)* 9 (1958), 63-67. (A. J. Macintyre) 20 #5280.

Shah, Tao-Shing. (=Shah, Tao-shing; Dao-Shing; Sya, Do-Šin)

On the distortion of schlicht functions. *Acad. Sinica Science Record* 4, 209-212 (1951). (Chinese summary) (Goodman) 15-948.

On the coefficients of schlicht functions. *J. Chinese Math. Soc. (N.S.)* 1, 98-107 (1951). (Chinese summary) (A. W. Goodman) 17-141.

On the product of mapping radii for a system of non-overlapping domains. *Acta Math. Sinica* 3, 1-7 (1953). (Chinese and English) (A. W. Goodman) 17-141.

The principle of area in the theory of univalent functions. *Acta Math. Sinica* 3, 208-212 (1953). (Chinese, English summary) (A. W. Goodman) 17-141.

The product of the mapping radii of non-overlapping domains. *Acta Math. Sinica* 5, 27-36 (1955). (Chinese, English summary) (A. W. Goodman) 17-142.

On the moduli of some classes of analytic functions. *Acta Math. Sinica* 5 (1955), 439-454. (Chinese, English summary) (A. W. Goodman) 17-724.

On the mapping radii and Green functions of non-overlapping domains. *Acta Math. Sinica* 6 (1956), 13-18. (Chinese, English summary) 18-122.

Goluzin's number $(3 - \sqrt{5})/2$ is the radius of superiority in subordination. *Sci. Record (N.S.)* 1 (1957), 219-222. (E. Reich) 20 #6530.

On the radius of superiority in subordination. *Sci. Record (N.S.)* 1 (1957), 329-333. (E. Reich) 20 #6531.

Positive functionals of algebras. *Dokl. Akad. Nauk SSSR* 121 (1958), 233-235. (Russian) (M. M. Day) 20 #6045.

Sur le paradoxe de MM. Banach et Tarski. *Fund. Math.* 33, 229-234 (1945). (Blumberg) 8-17.

Sur le paradoxe de la sphère. *Fund. Math.* 33, 235-244 (1945). (Blumberg) 8-140.

Sur la noninvariance topologique de la propriété λ' . *Fund. Math.* 33, 264-268 (1945). (de Possel) 8-140.

Sur deux conséquences d'un théorème de Hausdorff. *Fund. Math.* 33, 269-272 (1945). (Randolph) 8-140.

Sur un problème de la théorie générale des ensembles. *Fund. Math.* 33, 299-302 (1945). (Hewitt) 7-420.

Un théorème sur les espaces métriques denses en soi. *Proc. Benares Math. Soc. (N. S.)* 7, no. 2, 29-31 (1945). (Arens) 9-243.

Zasady Algebry Wyższej. [Principles of Higher Algebra.] With an appendix by Andrzej Mostowski: Outline of Galois Theory. *Monografie Matematyczne*, vol. 11. Warszawa-Wrocław, 1946. xii + 437 pp. (Polish) (Eilenberg) 8-498.

Sur une proposition équivalente à l'axiome du choix. *Actas Acad. Ci. Lima* 9, 111-112 (1946). (Viola) 8-3.

Sur la non-existence des décompositions paradoxales d'ensembles linéaires. *Actas Acad. Ci. Lima* 9, 113-117 (1946). (Viola) 8-17.

Sur un ensemble ordonné de puissance supérieure à celle du

continu. *Actas Acad. Ci. Lima* 9, 137-138 (1946). (Blumberg) 8-320.

Sur les types d'ordre de puissance du continu. *Actas Acad. Ci. Lima* 9, 267-269 (1946). (Blumberg) 9-17.

Sur une proposition de Mlle. S. Piccard. *Comment. Math. Helv.* 18, 349-352 (1946). (Blumberg) 8-140.

Sur un problème de triades. *C. R. Soc. Sci. Varsovie* 33-38, 13-16 (1946). (French. Polish summary) (Gustin) 8-570.

Sur une propriété des espaces métriques dénombrables. *Portugaliae Math.* 5, 193-194 (1946). (Arens) 8-479.

Sur la décomposition des ensembles en paires. *Proc. Benares Math. Soc. (N. S.)* 8, no. 2, 31-34 (1946). (Randolph) 12-84.

Sur les types d'ordre de puissance du continu. *Revista Ci.*, Lima 48, 305-307 (1946). (J. Todd) 8-570.

Sur une suite infinie de fonctions continues dont toute fonction d'accumulation est non mesurable. *Acad. Serbe Sci. Publ. Inst. Math.* 1, 5-10 (1947). (Randolph) 12-811.

Sur certains systèmes déterminants. *Actas Acad. Ci. Lima* 10, 17-23 (1947). (Rosenthal) 9-274.

Sur un théorème de A. Lindenbaum. *Ann. of Math.* (2) 48, 641-642 (1947). (Erdős) 9-17.

Remarque sur l'axiome du choix pour l'espace de fonctions continues. *Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat.* (8) 3, 216-217 (1947). (Graves) 9-573.

Remarque sur une hypothèse des Chinois concernant les nombres $(2^n - 2)/n$. *Colloquium Math.* 1, 9 (1947). (Bolydreff) 9-331.

Sur la congruence des ensembles de points et ses généralisations. *Comment. Math. Helv.* 19, 215-226 (1947). 8-255.

L'hypothèse généralisée du continu et l'axiome du choix. *Fund. Math.* 34, 1-5 (1947). (J. Todd) 8-506.

Sur un théorème de M. Tarski concernant les alephs. *Fund. Math.* 34, 6-8 (1947). (Jónsson) 9-16.

Sur un ensemble plan qui se décompose en 2^{\aleph_0} ensembles disjoints superposables avec lui. *Fund. Math.* 34, 9-13 (1947). (Blumberg) 9-17.

Deux théorèmes sur les familles de transformations. *Fund. Math.* 34, 30-33 (1947). (Hewitt) 9-17.

Les correspondances multivoques et l'axiome du choix. *Fund. Math.* 34, 39-44 (1947). (J. Todd) 8-570.

Sur un espace complet qui n'admet pas le théorème de Souslin. *Fund. Math.* 34, 66-68 (1947). (J. Todd) 8-570.

Sur un problème concernant le crible de M. Lusin. *Fund. Math.* 34, 69-71 (1947). (J. Todd) 8-570.

Un théorème sur les puissances des ensembles. *Fund. Math.* 34, 72-74 (1947). (J. Todd) 8-570.

Démonstration de l'égalité $2^m - m = 2^m$ pour les nombres cardinaux transfinis. *Fund. Math.* 34, 113-118 (1947). (Jónsson) 9-338.

Sur la différence de deux nombres cardinaux. *Fund. Math.* 34, 119-126 (1947). (Jónsson) 9-338.

Sur l'implication $(2m \leq 2n) \rightarrow (m \leq n)$ pour les nombres cardinaux. *Fund. Math.* 34, 148-154 (1947). (Jónsson) 9-338.

Sur l'inversion du théorème de Bolzano-Weierstrass généralisé. *Fund. Math.* 34, 155-156 (1947). (Hewitt) 9-83.

Sur une proposition qui entraîne l'existence des ensembles non mesurables. *Fund. Math.* 34, 157-162 (1947). (Blumberg) 9-338.

Sur les images de classe 1 d'ensembles linéaires. *Fund. Math.* 34, 163-165 (1947). (Rosenthal) 9-177.

Opérations sur les familles d'ensembles. *Proc. Benares Math. Soc. (N. S.)* 9, no. 1, 1-24 (1947). (Hewitt) 12-84.

Le paradoxe de Hausdorff et le paradoxe de Banach et Tarski. *Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat.* (8) 4, 270-272 (1948). (Blumberg) 10-106.

Sur un problème de M. N. Lusin. *Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat.* (8) 4, 519-520 (1948). (Hewitt) 10-184.

Remarque sur la répartition des nombres premiers. *Colloquium Math.* 1, 193-194 (1948). (James) 10-431.

Sur la division des types ordinaux. *Fund. Math.* 35, 1-12 (1948). (John Todd) 10-358.

Sur les ensembles presque contenus les uns dans les autres. *Fund. Math.* 35, 141-150 (1948). (Gustin) 10-689.

Sur l'équivalence des ensembles par décomposition en deux parties. *Fund. Math.* 35, 151-158 (1948). (Blumberg) 10-437.

Sur les translations des ensembles linéaires. *Fund. Math.* 35, 159-164 (1948). (Halperin) 10-287.

Sur un problème de la théorie générale des ensembles équivalent au problème de Souslin. *Fund. Math.* 35, 165-174 (1948). (John Todd) 10-358.

Sur un paradoxe de M. J. van Neumann. *Fund. Math.* 35, 203-207 (1948). (Blumberg) 10-437.

Sur l'analyticité de l'espace D_ω au sens de M. Menger. *Fund. Math.* 35, 208-212 (1948). (John Todd) 10-358.

Exemple effectif d'une famille de 2^{\aleph_1} ensembles linéaires croissants. *Fund. Math.* 35, 213-216 (1948). (Blumberg) 10-689.

Sur une propriété de la droite qui résulte de l'hypothèse du continu. *Mathematica, Timișoara* 23, 52-53 (1948). (Blumberg) 10-106.

Sur quelques propriétés du nombre 2^{\aleph_0} . *Mathematica, Timișoara* 23, 60-64 (1948). (Jónsson) 10-287.

Sur un problème concernant les espaces métriques. *Mathematica, Timișoara* 23, 65-69 (1948). (L. W. Cohen) 10-54.

Remarque sur les espaces topologiques. *Revista Cl.*, Lima 50, 193-196 (1948). (Arens) 10-557.

Sur une proposition de A. Lindenbaum équivalente à l'axiome du choix. *Soc. Sci. Lett. Varsovie. C. R. Cl. III. Sci. Math. Phys.* 40 (1947), 1-3 (1948). (French. Polish summary) (Novak) 11-335.

Sur une famille d'ensembles linéaires singuliers. *Soc. Sci. Lett. Varsovie. C. R. Cl. III. Sci. Math. Phys.* 40 (1947), 17-21 (1948). (French. Polish summary) (Rosenthal) 11-335.

Remarque sur deux axiomatiques des espaces abstraits. *Soc. Sci. Lett. Varsovie. C. R. Cl. III. Sci. Math. Phys.* 40 (1947), 46-49 (1948). (French. Polish summary) (Tong) 12-518.

Sur les relations entre quelques propriétés fondamentales des espaces topologiques. *Soc. Sci. Lett. Varsovie. C. R. Cl. III. Sci. Math. Phys.* 40 (1947), 66-78 (1948). (French. Polish summary) (Tong) 12-195.

Remarques sur la décomposition des nombres en sommes des carrés de nombres impairs. *Colloquium Math.* 2, 52-55 (1949). (Lehmer) 12-481.

Sur une décomposition de la droite. *Comment. Math. Helv.* 22, 317-320 (1949). (Blumberg) 10-689.

Sur les ensembles linéaires dénombrables non équivalents par décomposition finie. *Fund. Math.* 36, 1-6 (1949). (Blumberg) 11-165.

Sur un problème de M. Lusin concernant les complémentaires analytiques. *Fund. Math.* 36, 44-47 (1949). (Kunugi) 11-675.

Sur les familles croissantes d'ensembles fermés. *Fund. Math.* 36, 48-50 (1949). (A. H. Stone) 11-165.

Sur l'opération $\lim_{x \rightarrow +\infty} \Phi(x, y)$. *Fund. Math.* 36, 51-55 (1949). (L. W. Cohen) 11-239.

Sur une propriété des ensembles ordonnés. *Fund. Math.* 36, 56-67 (1949). (Novak) 11-165.

Sur la décomposition des espaces métriques en ensembles disjoints. *Fund. Math.* 36, 68-71 (1949). (Moise) 11-120.

Sur les séries infinies de nombres ordinaux. *Fund. Math.* 36, 248-253 (1949). (Bagemihl) 12-14.

Leçons sur les nombres transfinis. Gauthier-Villars, Paris, 1950. vi + 240 pp. 11-423.

Teoria liczb. [Theory of numbers.] 3rd ed. *Monografie Matematyczne, Tom XIX. Warszawa, Wrocław, 1950.* vi + 544 pp. (Krasner) 13-821.

Les ensembles projectifs et analytiques. *Mémor. Sci. Math.*, no. 112. Gauthier-Villars, Paris, 1950. 80 pp. (G. T. Whyburn) 14-627.

Solution de l'équation $\omega^\xi = \xi^\omega$ pour les nombres ordinaux. *Acta Sci. Math. Szeged* 12, Leopoldo Fejér et Frederico Riesz LXX annos natis dedicatus, Pars B, 49-50 (1950). (Bagemihl) 11-646.

Contribution à l'étude des restes cubiques. *Ann. Soc. Polon. Math.* 22 (1949), 269-272 (1950). (Bateman) 11-641.

Sur les puissances du nombre 2. *Ann. Soc. Polon. Math.* 23, 246-251 (1950). (Lehmer) 12-674.

Sur la périodicité mod m de certaines suites infinies d'entiers. *Ann. Soc. Polon. Math.* 23, 252-258 (1950). (Erdős) 12-674.

Sur les types ordinaux des ensembles linéaires. *Atti Accad. Naz. Lincei. Rend. Cl. Sci. Fis. Mat. Nat.* (8) 8, 427-428 (1950). (Bagemihl) 13-19.

Sur quelques problèmes concernant la congruence des ensembles de points. *Elemente der Math.* 5, 1-4 (1950). (Randolph) 12-809.

Sur un ensemble plan singulier. *Fund. Math.* 37, 1-4 (1950). (Moise) 12-597.

Sur les suites doubles de fonctions. *Fund. Math.* 37, 55-62 (1950). (Botts) 14-148.

Le dernier théorème de Fermat pour les nombres ordinaux. *Fund. Math.* 37, 201-205 (1950). (Erdős) 12-683.

Sur un type ordinal dénombrable qui a une infinité indénombrable de diviseurs gauches. *Fund. Math.* 37, 206-208 (1950). (Erdős) 12-683.

L'équivalence par décomposition finie et la mesure extérieure des ensembles. *Fund. Math.* 37, 209-212 (1950). (Oxtoby) 12-684.

Sur les types d'ordre des ensembles linéaires. *Fund. Math.* 37, 253-264 (1950). (Bagemihl) 13-19.

Sur une définition des espaces complets. *Gapita* 1, 13-16 (1950). (Blumenthal) 12-729.

Sur la convergence absolument uniforme des séries de fonctions. *Gapita* 1, 97-101 (1950). (A. Rosenthal) 13-455.

Dernières recherches et problèmes de la théorie des ensembles. *Matematiche, Catania* 5, 3-14 (1950). 12-397.

Un théorème sur les nombres premiers. *Matematiche, Catania* 5, 66-67 (1950). (W. H. Simons) 12-590.

L'opération du crible et les fonctions analytiques d'une suite infinie d'ensembles. *Soc. Sci. Lett. Varsovie. C. R. Cl. III. Sci. Math. Phys.* 41 (1948), 47-62 (1950). (French. Polish summary) (Appert) 13-217.

Zasady algebry wyższej z przypisem Andrzeja Mostowskiego zarys teorii Galois. [Principles of Higher Algebra with an appendix by Andrzej Mostowski, Outline of Galois Theory.] 2d ed. *Monografie Matematyczne, Tom XI. Polskie Towarzystwo Matematyczne, Warszawa-Wrocław, 1951.* viii + 436 pp. 13-311.

Algèbre des ensembles. *Monografie Matematyczne, Tom XXIII. Polskie Towarzystwo Matematyczne, Warszawa-Wrocław, 1951.* ii + 205 pp. (Pauc) 13-541.

Sur une propriété des ensembles plans équivalente à l'hypothèse du continu. *Bull. Soc. Roy. Sci. Liège* 20, 297-299 (1951). (Erdős) 13-330.

Une proposition de la géométrie élémentaire équivalente à l'hypothèse du continu. *C. R. Acad. Sci. Paris* 232, 1046-1047 (1951). (Erdős) 13-330.

Sur un problème de M. J. Novák. *Czechoslovak Math. J.* 1(76), 97-101 (1951) = *Čechoslovak. Mat. Ž.* 1(76), 117-122 (1951). (Gustin) 13-828.

Sur quelques propositions concernant la puissance du continu. *Fund. Math.* 38, 1-13 (1951). (Bagemihl) 14-26.

Sur les fonctions continues d'une variable ordinaire. *Fund. Math.* 38, 204-208 (1951). (Erdős) 13-828.

Sur une propriété des ensembles plans fermés et bornés. *Matematiche, Catania* 6, 132-134 (1951). (D. W. Hall) 13-673.

Sur l'existence des nombres premiers avec une suite arbitraire de chiffres initiaux. *Matematiche, Catania* 6, 135-137 (1951). (Lehmer) 13-822.

Un théorème sur les nombres premiers. *Matematiche, Catania* 6, 138 (1951). 13-625.

Dernières recherches et problèmes de la théorie des ensembles. Univ. Roma. Ist. Naz. Alta Mat. Rend. Mat. e Appl. (5) 10, 1-11 (1951). 13-828.

Sur quelques résultats nouveaux concernant l'hypothèse du continu. Univ. Roma. Ist. Naz. Alta Mat. Rend. Mat. e Appl. (5) 10, 406-411 (1951). (Erdős) 13-828.

General topology. Translated by C. Cecilia Krieger. Mathematical Expositions, No. 7, University of Toronto Press, Toronto, 1952. xii + 290 pp. (Kelley) 14-394.

Sur les diviseurs de types ordinaux. Comptes Rendus du Premier Congrès des Mathématiciens Hongrois, 27 Août - 2 Septembre 1950, pp. 397-399. Akadémiai Kiadó, Budapest, 1952. (Hungarian and Russian summaries) (Bagemihl) 14-1069.

Sur les opérations dans l'ensemble à 3 éléments. Ann. Soc. Polon. Math. 24 (1951), 13-18 (1952). (Gustin) 14-25.

Sur une propriété des nombres premiers. Bull. Soc. Roy. Sci. Liège 21, 537-539 (1952). (Lehmer) 15-11.

Un théorème sur les familles de fonctions et son application aux espaces topologiques (solution d'un problème de R. Sikorski). Colloquium Math. 2 (1951), 198-201 (1952). (Erdős) 14-25.

Sur une formule donnant tous les nombres premiers. C. R. Acad. Sci. Paris 235, 1078-1079 (1952). (Niven) 14-355.

Sur une propriété paradoxale de l'espace à trois dimensions équivalente à l'hypothèse du continu. Rend. Circ. Mat. Palermo (2) 1, 7-10 (1952). (Bagemihl) 14-26.

Sur un problème de M. Zarankiewicz. Soc. Sci. Lett. Varsovie. C. R. Cl. III. Sci. Math. Phys. 42 (1949), 1-3 (1952). (French, Polish summary) (Bagemihl) 14-146.

Sur un exemple de M. Kunugi de la théorie des espaces abstraits. Soc. Sci. Lett. Varsovie. C. R. Cl. III. Sci. Math. Phys. 42 (1949), 4-8 (1952). (French, Polish summary) (Bagemihl) 14-68.

Un théorème sur les fonctions d'ensemble. Soc. Sci. Lett. Varsovie. C. R. Cl. III. Sci. Math. Phys. 42 (1949), 18-22 (1952). (French, Polish summary) (Arens) 14-26.

Sur quelques propriétés des familles d'ensembles. Soc. Sci. Lett. Varsovie. C. R. Cl. III. Sci. Math. Phys. 42 (1949), 30-35 (1952). (French, Polish summary) (G. T. Whyburn) 13-828.

Sur quelques propositions qui entraînent l'existence des ensembles non mesurables. Soc. Sci. Lett. Varsovie. C. R. Cl. III. Sci. Math. Phys. 42 (1949), 36-40 (1952). (Polish summary) (Bagemihl) 14-456.

Sur les bases dénombrables de la famille de tous les ensembles linéaires dénombrables. Soc. Sci. Lett. Varsovie. C. R. Cl. III. Sci. Math. Phys. 42 (1949), 182-184 (1952). (French, Polish summary) (Kurepa) 13-923.

Sur l'extension d'un théorème de M. D. Pompeiu aux nombres transfinis. Soc. Sci. Lett. Varsovie. C. R. Cl. III. Sci. Math. Phys. 43 (1950), 1-3 (1952). (Bagemihl) 14-1068.

Sur les produits infinis de nombres ordinaux. Soc. Sci. Lett. Varsovie. C. R. Cl. III. Sci. Math. Phys. 43 (1950), 20-24 (1952). (Bagemihl) 14-1068.

Sur quelques conséquences du théorème de M. Kondo concernant l'uniformisation des complémentaires analytiques. Soc. Sci. Lett. Varsovie. C. R. Cl. III. Sci. Math. Phys. 44 (1951), 56-62 (1952). (Erdős) 14-960.

Sur une homéomorphie de classe 1, 1 entre un segment de droite et un carré. Soc. Sci. Lett. Varsovie. C. R. Cl. III. Sci. Math. Phys. 44 (1951), 62-65 (1952). (Bagemihl) 14-1069.

Généralisation d'une formule de E. B. Escott pour les racines carrées. Bull. Soc. Roy. Sci. Liège 22, 520-529 (1953). (Agnew) 15-699.

Coup d'oeil sur l'état actuel de l'hypothèse du continu. Elemente der Math. 8, 1-4 (1953). 14-544.

Sur les types ordinaux dont tous les vrais restes sont égaux. Fund. Math. 39 (1952), 1-7 (1953). (Bagemihl) 14-1069.

Une généralisation des théorèmes de S. Mazurkiewicz et F. Bagemihl. Fund. Math. 40, 1-2 (1953). (Erdős) 15-609.

Sur une propriété des ensembles analytiques linéaires (solution d'un problème de E. Marczewski). Fund. Math. 40, 171 (1953). (Kurepa) 15-690.

Sur un théorème de recouvrement équivalent à un cas particulier de l'axiome du choix. Ganita 4, 155-158 (1953). (Bagemihl) 16-343.

Sur un théorème concernant l'équivalence des ensembles de points par décomposition finie. Matematiche, Catania 8, no. 1, 10-13 (1953). (Halmos) 16-228.

Sur une propriété de fonctions réelles quelconques. Matematiche, Catania 8, no. 2, 43-48 (1953). (T. Botts) 16-229.

Sur une propriété de fonctions réelles quelconques définies dans les espaces métriques. Matematiche, Catania 8, no. 2, 73-78 (1953). (Botts) 16-230.

Remarques sur un théorème de M. G. Kurepa concernant les correspondances multivoques. Matematiche, Catania 8, no. 2, 79-81 (1953). (G. Kurepa) 17-467.

On the congruence of sets and their equivalence by finite decomposition. Lucknow University Studies, no. xx. The Lucknow University, Lucknow, 1954. 117 pp. (Halmos) 15-691.

Trójkąty pitagorejskie. [Pythagorean triples.] Państwowe Wydawnictwo Naukowe, Warszawa, 1954. 94 pp. (Lehmer) 16-447.

Remarques sur les racines d'une congruence. Ann. Polon. Math. 1, 89-90 (1954). (Carlitz) 15-934.

Sur un problème concernant un réseau à 36 points. Ann. Soc. Polon. Math. 24 (1951), no. 2, 173-174 (1954). (Erdős) 15-594.

Un théorème concernant les fonctions continues dans les ensembles ordonnés. Ann. Soc. Polon. Math. 24 (1951), no. 2, 175-180 (1954). (Erdős) 15-691.

Sur une proposition équivalente à l'existence d'un ensemble de nombres réels de puissance \aleph_1 . Bull. Acad. Polon. Sci. Cl. III. 2, 53-54 (1954). (Bagemihl) 16-343.

Remarques sur les progressions arithmétiques. Colloquium Math. 3, 44-49 (1954). (Lehmer) 15-854.

Sur une relation entre deux substitutions linéaires. Fund. Math. 41, 1-5 (1954). (Moise) 16-681.

Sur les espaces métriques séparables contenant un nombre fini de points d'accumulation. Matematiche, Catania 9, 122-125 (1954). (Shanks) 16-1041.

Arytmetyka teoretyczna. [Theoretical arithmetic.] With the cooperation of Jerzy Łoś. Państwowe Wydawnictwo Naukowe, Warszawa, 1955. 258 pp. (M. Kac) 16-998.

Sur une propriété des nombres naturels. Ann. Mat. Pura Appl. (4) 39 (1955), 69-74. (L. Mirsky) 17-711.

Sur une propriété de la droite équivalente à l'hypothèse du continu. Ganita 5 (1954), 113-116 (1955). (L. Gillman) 19-4.

Sur les ensembles de nombres naturels qui ont un nombre fini d'éléments communs avec toute leur translation. Ganita 5 (1954), 137-141 (1955). (R. A. Rankin) 18-792.

Sur la lacunarité au sens de S. Hartman de la suite de tous les nombres premiers. Matematiche, Catania 10 (1955), 67-70. (H. Halberstam) 17-586.

Quelques résultats et problèmes concernant la congruence des ensembles de points. Matematiche, Catania 10 (1955), 71-79. 17-592.

Les nombres de Mersenne et de Fermat. Matematiche, Catania 10 (1955), 80-91. (D. H. Lehmer) 17-711.

L'axiome du choix pour les ensembles finis. Matematiche, Catania 10 (1955), 92-99. (P. R. Halmos) 17-716.

Sur un problème concernant les suites infinies d'ensembles. Rend. Sem. Mat. Messina 1 (1955), 143-145. (L. Gillman) 19-377.

Prime numbers. Wiadom. Mat. (2) 1, 47-64 (1955). (Polish) 16-998.

Hypothèse du continu. 2nd ed. Chelsea Publishing Company, New York, N. Y., 1956. xvii + 274 pp. (L. Gillman) 19-829.

- Sur quelques problèmes arithmétiques de la théorie des nombres ordinaux. *Czechoslovak Math. J.* 6(81) (1956), 161-163. (Russian summary) (S. Ginsburg) 18-711.
- Sur l'équation $\xi^2 = \eta^3 + 1$ pour les nombres ordinaux transfinis. *Fund. Math.* 43 (1956), 1-2. (F. Bagemihl) 17-1190.
- Sur une propriété des nombres ordinaux. *Fund. Math.* 43 (1956), 139-140. (F. Bagemihl) 17-1190.
- Sur les décompositions de nombres rationnels en fractions primaires. *Mathesis* 65 (1956), 16-32. (P. Erdős) 17-1185.
- What we know and what we do not know about decomposition of natural numbers into a sum of squares, cubes, and fourth powers. *Prace Mat.* 2 (1956), 56-64. (Polish) (V. Knichal) 19-15.
- On certain expansions of real numbers into infinite fast-converging products. *Prace Mat.* 2 (1956), 131-138. (Polish. Russian and English summaries) (K. Zeller) 18-888.
- Sur une propriété de la fonction $\phi(n)$. *Publ. Math. Debrecen* 4 (1956), 184-185. (H. S. Zuckerman) 18-17.
- Les mathématiques en Pologne. *Glasnik Mat.-Fiz. Astr. Društvo Mat. Fiz. Hrvatske Ser. II.* 12 (1957), 125-132. 20 #3860.
- Remarque sur "A note on triangular numbers" de M. B. Stolt. *Portugal. Math.* 15 (1956), 123 (1957). (L. Moser) 19-942.
- Cardinal and ordinal numbers. *Polska Akademia Nauk, Monografie Matematyczne. Tom 34. Państwowe Wydawnictwo Naukowe, Warsaw, 1958.* 487 pp. (L. Gillman) 20 #2288.
- Sur quelques problèmes concernant les points aux coordonnées entières. *Enseignement Math.* (2) 4 (1958), 25-31. (C. G. Lekkerkerker) 20 #4518.
- Sur un théorème de S. Saks concernant les suites infinies de fonctions continues. *Fund. Math.* 46 (1958), 117-121. (T. H. Hildebrandt) 20 #5830.

Invariant extensions of linear operators. Abstract of a thesis, University of Illinois, Urbana, Ill., 1952. ii + 2 + i pp. 13-951.

Invariant linear functions. *Trans. Amer. Math. Soc.* 81 (1956), 411-424. (E. Hewitt) 18-492.

Means on semi-groups and the Hahn-Banach extension property. *Trans. Amer. Math. Soc.* 83 (1956), 222-237. (J. L. Kelley) 18-910.

Invariant means and cones with vector interiors. *Trans. Amer. Math. Soc.* 88 (1958), 75-79. (J. L. Kelley) 20 #1917a.

---- and Yen, Ti.

Addendum to "Invariant means and cones with vector interiors". *Trans. Amer. Math. Soc.* 88 (1958), 327-330. (J. L. Kelley) 20 #1917b.

Silverstone, H. (See also Aitken, A. C.)

A note on the cumulants of Kendall's S-distribution. *Biometrika* 37, 231-235 (1950). (Craig) 12-344.

The equivalence of asymptotic distributions under randomisation and normal theories. *Proc. Glasgow Math. Assoc.* 1, 139-147 (1953). (Noether) 15-239.

The asymptotic distributions of statistics arising in certain non-parametric tests. *Proc. Glasgow Math. Assoc.* 2, 47-51 (1954). (Noether) 15-885.

A problem associated with a particular Markov chain. *Proc. Glasgow Math. Assoc.* 2, 100-104 (1954). (Snell) 16-379.

Estimating the logistic curve. *J. Amer. Statist. Assoc.* 52 (1957), 567-577. (G. Kallianpur) 20 #2054.

The Lindisfarne scribes' problem. *J. Roy. Statist. Soc. Ser. B.* 20 (1958), 93-101. (J. Hannan) 20 #2056.

Silvey, Samuel D. See Aitchison, John.

Sim, A. C.

A generalization of reversion formulae with their application to non-linear differential equations. *Philos. Mag.* (7) 42, 228-238 (1951). (Levinson) 13-38.

Simaika, J. B.

On an optimum property of two important statistical tests. *Biometrika* 32, 70-80 (1941). (Neyman) 2-236.

Interpolation for fresh probability levels between the standard table levels of a function. *Biometrika* 32, 263-276 (1942). (Wald) 4-20.

Note on M. Fréchet index of correlation. *Proc. Math. Phys. Soc. Egypt* 3 (1946), no. 2, 21-22 (1947). (Tukey) 8-592; 11-870.

On the significance of a typical value in the renewal theory. *Skand. Aktuarietidskr.* 30, 121-129 (1947). (Feller) 9-452.

On a difference equation in renewal theory. *Proc. Math. Phys. Soc. Egypt* 3 (1947), no. 3, 15-23 (1948). (Feller) 10-542; 11-870.

On a method of curve fitting and its application to the variation of the note issue in Egypt. *Proc. Math. Phys. Soc. Egypt* 3, no. 4, 65-72 (1948). (Greville) 11-265, 871.

On two characteristics of a random direction. *Proc. Math. Phys. Soc. Egypt* 5 (1956), no. 4, 113-119 (1957). (Arabic summary) (H. P. McKean, Jr.) 19-1201.

Simaika, Jacques.

Sur une valeur typique d'une distribution de directions. *C. R. Acad. Sci. Paris* 241 (1955), 1375-1377. (H. P. McKean, Jr.) 17-500.

Sur une mesure de la dispersion d'une distribution de directions. *Bull. Acad. Polon. Sci. Cl. III.* 4 (1956), 753-756. (H. P. McKean, Jr.) 18-679.

Šimanov, S. N.

On the theory of quasiharmonic oscillations. Akad. Nauk SSSR. Prikl. Mat. Meh. 16, 129-146 (1952). (Russian) (Lefschetz) 13-745.

On stability of solution of a nonlinear equation of the third order. Akad. Nauk SSSR. Prikl. Mat. Meh. 17, 369-372 (1953). (Russian) (Lefschetz) 14-1087.

On the stability of the solution of a nonlinear system of equations. Uspehi Matem. Nauk (N.S.) 8, no. 6(58), 155-157 (1953). (Russian) (Lefschetz) 15-795.

On the theory of oscillations of quasilinear systems. Akad. Nauk SSSR. Prikl. Mat. Meh. 18, 155-162 (1954). (Russian) (Massera) 16-131.

On a method of obtaining conditions for the existence of periodic solutions of nonlinear systems. Prikl. Mat. Meh. 19, 225-228 (1955). (Russian) (J. L. Massera) 17-264.

On the problem of finding the characteristic exponents of systems of linear differential equations with periodic coefficients. Dokl. Akad. Nauk SSSR (N.S.) 109 (1956), 1102-1105. (Russian) (S. Lefschetz) 18-395.

Oscillations of quasilinear systems with a nonanalytic characteristic of nonlinearity. Prikl. Mat. Meh. 21 (1957), 244-252. (Russian) (S. Lefschetz) 19-652.

Simasaki, Tamed.

Application of Poggi's method to the calculation of complex velocity potential for compressible fluid flow. Proceedings of the First Japan National Congress for Applied Mechanics, 1951, pp. 343-347. Science Council of Japan, Tokyo, 1952. (W. R. Sears) 17-682.

Šimbireva, H. (=Shimbireva)

On the theory of partially ordered groups. Rec. Math. [Mat. Sbornik] N.S. 20(62), 145-178 (1947). (Russian). English summary (Freudenthal) 8-563.

Simboan, G.

Dérivées directes d'ordre p , des fonctions à valeurs en espaces de Banach. Com. Acad. R. P. Roum 5 (1955), 1139-1144. (Romanian, Russian and French summaries) (M. M. Day) 17-468.

Simionescu, C.

La détermination des invariants des espaces nonholonomes V_5^3 de classe cinq et d'espèce trois. An. Univ. "C. I. Parhon" București. Ser. Ști. Nat. 5 (1956), no. 12, 33-39. (Romanian, French and Russian summaries) (D. J. Struik) 20 #2017.

On certain exponential equations. Norske Vid. Selsk. Forh. 18, no. 18, 71-74 (1945). (de Bruijn) 8-7.

On the prime divisors of the values of certain functions. Norske Vid. Selsk. Forh. 18, no. 19, 75-78 (1945). (de Bruijn) 8-7.

Recursive arithmetic. Norsk Mat. Tidsskr. 28, 1-12 (1946). (Norwegian) (Curry) 8-125.

A proof of the algebraic independence of e and $e\sqrt{-d}$, d positive integer, with another proof of the irrationality of $\log x$ and $\arctg x$ for rational x . Norsk Mat. Tidsskr. 28, 97-104 (1946). (Popken) 10-18.

Solutions of the equation $axy + bx + cy + d = 0$ in algebraic integers. Avh. Norske Vid. Akad. Oslo. I. 1946, no. 3, 8 pp. (1947). (Niven) 9-270.

The development of recursive arithmetic. C. R. Dixième Congrès Math. Scandinaves 1946, pp. 1-16. Jul. Gjellerups Forlag, Copenhagen, 1947. (Curry) 8-558.

The non-symmetric functions in algebra. Norsk Mat. Tidsskr. 29, 65-74 (1947). (Norwegian) (Ore) 9-170.

A remark on the preceding article of M. Nyberg. Norsk Mat. Tidsskr. 29, 79 (1947). (Norwegian) 9-175.

A proof of the algebraic independence of certain values of the exponential function. Norske Vid. Selsk. Forh., Trondhjem 19, no. 12, 40-43 (1947). (Popken) 9-413.

On the existence of a multiplicative basis for an arbitrary algebraic field. Norske Vid. Selsk. Forh., Trondhjem 20, no. 2, 4-7 (1947). (Todd-Taussky) 10-104.

A property of ternary quadratic forms and its connection with the quadratic reciprocity theorem. Norsk Mat. Tidsskr. 30, 1-10 (1948). (Norwegian) (Nagell) 10-15, 855.

Two generalizations of a well known theorem on polynomials. I. Norske Vid. Selsk. Forh., Trondhjem 20, no. 19, 70-73 (1948). (Todd-Taussky) 11-314.

Two generalizations of a well known theorem on polynomials. II. Norske Vid. Selsk. Forh., Trondhjem 20, no. 20, 74-77 (1948). (Todd-Taussky) 11-314.

Remark on the articles of H. Rasiowa and A. Rose in this volume. Norsk Mat. Tidsskr. 31, 115 (1949). (Norwegian) 11-303.

A proof of the irreducibility of the cyclotomic equation. Norsk Mat. Tidsskr. 31, 116-120 (1949). (Lehmer) 11-645.

On the Diophantine equation $ax^2 + by^2 + cz^2 + du^2 = 0$. Norske Vid. Selsk. Forh., Trondhjem 21, no. 19, 76-79 (1949). (Niven) 11-642.

Remarks on the representation of natural numbers as sums of three or four squares. Norske Vid. Selsk. Forh., Trondhjem 21, no. 39, 172-175 (1949). (Niven) 11-582.

Proof of a theorem on 3-lattices. Norske Vid. Selsk. Forh., Trondhjem 21, no. 44, 197-200 (1949). (Tornheim) 11-582.

The logical paradoxes and remedies for them. Norsk. Mat. Tidsskr. 32, 2-11 (1950). (Norwegian) (Curry) 11-708.

A remark on the induction scheme. Norske Vid. Selsk. Forh., Trondhjem 22, no. 36, 167-170 (1950). (Curry) 11-635.

An arithmetical property of the function $\sum_{n=0}^{\infty} x^n / \prod_{i=0}^{\lambda} p_i^{x_i(n)}$, where the p_i are natural primes and the $X_i(n)$ polynomials with integral coefficients. Norske Vid. Selsk. Forh., Trondhjem 22, no. 39, 183-187 (1950). (Schneider) 12-243.

Remarks concerning the indeterminate equation $xy + yz + zx = k$, k a positive integer, together with the analogue in several unknowns. Norsk Mat. Tidsskr. 33, 41-49 (1951). (Norwegian) (Niven) 13-321.

Theory of divisibility in some commutative semi-groups. Norsk Mat. Tidsskr. 33, 82-88 (1951). (Rees) 13-430.

A simple proof for a solvability condition for the Diophantine equation $ax^2 + by^2 + cz^2 = 0$. Norsk Mat. Tidsskr. 33, 105-112 (1951). (Norwegian) (Ore) 13-437.

Existence of an n th non-power residue mod p less than \sqrt{p} . Norsk Mat. Tidsskr. 33, 123-126 (1951). (Norwegian) (Ore) 14-21.

Some remarks on semi-groups. Norske Vid. Selsk. Forh., Trondhjem 24, 42-47 (1951). (Rees) 13-906.

Theorems of divisibility in some semi-groups. Norske Vid. Selsk. Forh., Trondhjem 24, 48-53 (1951). (Rees) 13-906.

On the abscissa of convergence for some Dirichlet's series. Norske Vid. Selsk. Forh., Trondhjem 24, 54-59 (1951). (Hille) 13-837.

Some remarks on the foundation of set theory. Proceedings of the International Congress of Mathematicians, Cambridge, Mass., 1950, vol. 1, pp. 695-704. Amer. Math. Soc., Providence, R. I., 1952. (R. M. Martin) 13-521.

Some theorems on irrationality and linear independence. Den 11te Skandinaviske Matematikerkongress, Trondheim, 1949, pp. 77-98. Johan Grundt Tanums Forlag, Oslo, 1952. (Popken) 14-851.

On the nature of mathematical reasoning. Gaceta Mat. (1) 4, 113-124 (1952). (Spanish) (Curry) 15-91.

A remark on algebraic numbers. Norsk Mat. Tidsskr. 34, 14-17 (1952). (Carltitz) 13-916.

Application of 3-adic analysis and "cofields" to the proof of some theorems concerning certain cubic equations. Norsk Mat. Tidsskr. 34, 45-51 (1952). (Norwegian) (Ore) 14-19.

The general congruence of 4th degree modulo p , p prime. Norsk Mat. Tidsskr. 34, 73-80 (1952). (Niven) 14-353.

On a certain connection between the discriminant of a polynomial and the number of its irreducible factors mod p . Norsk Mat. Tidsskr. 34, 81-85 (1952). (Carltitz) 14-251.

On the proofs of independence of the axioms of the classical sentential calculus. Norske Vid. Selsk. Forh., Trondhjem 24 (1951), 20-25 (1952). (R. M. Martin) 14-526.

A simple proof of the condition of solvability of the Diophantine equation $ax^2 + by^2 + cz^2 = 0$. Norske Vid. Selsk. Forh., Trondhjem 24 (1951), 102-107 (1952). (Niven) 14-136.

On the diophantine equation $ax^2 + by^2 + cz^2 = 0$. Univ. Roma. Ist. Naz. Alta Mat. Rend. Mat. e Appl. (5) 11, 88-100 (1952). (Niven) 15-601.

Some considerations concerning recursive functions. Math. Scand. 1, 213-221 (1953). (Frink) 15-667.

A theorem on some semi-groups. Norske Vid. Selsk. Forh., Trondhjem 25 (1952), 72-77 (1953). (Clifford) 14-842.

- A remark on a set theory based on positive logic. *Norske Vid. Selsk. Forh.*, Trondheim 25 (1952), 112-116 (1953). (Novak Gál) 14-937.
- Considerations on the foundations of mathematics. *Revista Mat. Hisp.-Amer.* (4) 12, 169-200 (1952); 13, 149-174 (1953). (Spanish) (Curry) 15-92.
- Results in investigations in the foundations. *Tolft Skandinaviske Matematikerkongressen*, Lund, 1953, pp. 273-289 (1954). (Norwegian) (Curry) 16-553.
- The logical background of arithmetic. *Bull. Soc. Math. Belgique* 6 (1953), 23-34 (1954). (Kreisel) 16-553.
- Some considerations concerning recursive arithmetic. *Bull. Soc. Math. Belgique* 6 (1953), 35-46 (1954). (Kreisel) 16-553.
- An exposition of the theory of algebraic numbers. *Gaceta Mat.* (1) 6, 19-31, 71-84 (1954). (Spanish) (Brinkmann) 16-221.
- Remarks on "elementary" arithmetic functions. *Norske Vid. Selsk. Forh.*, Trondheim 27, no. 6, 6 pp. (1954). (Novak-Gál) 16-324.
- On the least odd positive quadratic non-residue modulo p . *Norske Vid. Selsk. Forh.*, Trondheim 27, no. 20, 7 pp. (1954). (Niven) 16-675.
- Peano's axioms and models of arithmetic. *Mathematical interpretation of formal systems*, pp. 1-14. North-Holland Publishing Co., Amsterdam, 1955. (E. Mendelson) 17-699, 1437.
- The use of a p -adic method in the theory of diophantine equations. *Bull. Soc. Math. Belg.* 1954, 83-95 (1955). 17-237.
- On relative Pell's equations. *Bull. Soc. Math. Belg.* 1954, 96-105 (1955). 17-237.
- Einige Bemerkungen über die Auffindung der rationalen Punkte auf gewissen algebraischen Gebilden. *Math. Z.* 63 (1955), 295-312. (B. Segre) 17-464.
- A critical remark on foundational research. *Norske Vid. Selsk. Forh.*, Trondheim 28 (1955), 100-105. (P. C. Gilmore) 17-817.
- The logical nature of arithmetic. *Synthese* 9, 375-384 (1955). (H. B. Curry) 18-269.
- A version of the proof of equivalence between complete induction and the uniqueness of primitive recursion. *Norske Vid. Selsk. Forh.*, Trondheim 29 (1956), 10-15. (G. Kreisel) 18-2.
- The abundance of arithmetic functions satisfying some simple functional equations. *Norske Vid. Selsk. Forh.*, Trondheim 29 (1956), 47-53. (G. Birkhoff) 18-275.
- Two remarks on set theory. *Math. Scand.* 5 (1957), 40-46. (E. J. Cogan) 19-933.
- On certain distributions of integers in pairs with given differences. *Math. Scand.* 5 (1957), 57-68. (H. Davenport) 19-1159.
- An ordered set of arithmetic functions representing the least ϵ -number. *Norske Vid. Selsk. Forh.*, Trondheim 29 (1956), 54-59 (1957). (S. Ginsburg) 18-785.
- Über einige Eigenschaften der Zahlenmengen $\{\alpha n + \beta\}$ bei irrationalem α mit einleitenden Bemerkungen über einige kombinatorische Probleme. *Norske Vid. Selsk. Forh.*, Trondheim 30 (1957), 42-49. (H. Davenport) 19-1159.
- Bemerkungen zum Komprehensionsaxiom. *Z. Math. Logik Grundlagen Math.* 3 (1957), 1-17. (H. B. Curry) 20 #3067.

---- and Soboleff, S. L.

Obituary: Nikolai Maksimovič Gunther. 1871-1941. Bull. Acad. Sci. URSS. Sér. Math. [Izvestia Akad. Nauk SSSR] 5, 193-197; list of publications, 197-202 (1941). (Russian) 3-98.

Smirnov, Yu. M. (See also Kolmogorov, A. N.)

On a class of topological spaces. Doklady Akad. Nauk SSSR (N. S.) 59, 1253-1256 (1948). (Russian) (Zippin) 9-522.

On the theory of completely regular spaces. Doklady Akad. Nauk SSSR (N. S.) 62, 749-752 (1948). (Russian) (Katětov) 10-315.

On systems of coverings of topological spaces. Doklady Akad. Nauk SSSR (N. S.) 69, 611-613 (1949). (Russian) (Hewitt) 11-381.

On topological spaces compact in a given interval of powers. Izvestiya Akad. Nauk SSSR. Ser. Mat. 14, 156-178 (1950). (Russian) (Hewitt) 11-675.

On irreducible cyclic bicomacta. Uspehi Matem. Nauk (N. S.) 5, no. 6(40), 157-158 (1950). (Russian) (Zippin) 12-729.

The Betti groups of the intersection of an infinite number of sets. Doklady Akad. Nauk SSSR (N. S.) 76, 29-32 (1951). (Russian) (Zippin) 13-268.

A necessary and sufficient condition for metrizability of a topological space. Doklady Akad. Nauk SSSR (N. S.) 77, 197-200 (1951). (Russian) (Katětov) 12-845.

Some relations in the theory of dimensions. Mat. Sbornik N. S. 29(71), 157-172 (1951). (Russian) (Hewitt) 13-372.

On normally disposed sets of normal spaces. Mat. Sbornik N. S. 29(71), 173-176 (1951). (Russian) (Hewitt) 13-371.

On coverings of topological spaces. Moskov. Gos. Univ. Učenyĭ Zapiski 148, Matematika 4, 204-215 (1951). (Russian) (Hewitt) 14-303.

On the theory of finally compact spaces. Ukrain. Mat. Žurnal 3, 52-60 (1951). (Russian) (Hewitt) 14-782.

On a problem connected with the metrizability of topological spaces. Ukrain. Mat. Žurnal 3, 161-163 (1951). (Russian) (Hewitt) 14-893.

On metrization of topological spaces. Uspehi Matem. Nauk (N. S.) 6, no. 6(46), 100-111 (1951). (Russian) (Hewitt) 14-70.

On proximity spaces in the sense of V. A. Efremovič. Doklady Akad. Nauk SSSR. (N. S.) 84, 895-898 (1952). (Russian) (Katětov) 14-1107.

On the weight of the ring of bounded continuous functions over a normal space. Mat. Sbornik N. S. 30(72), 213-218 (1952). (Russian) (Hewitt) 14-70.

Mappings of systems of open sets. Mat. Sbornik N. S. 31(73), 152-166 (1952). (Russian) (Hewitt) 14-303.

On proximity spaces. Mat. Sbornik N. S. 31(73), 543-574 (1952). (Russian) (Katětov) 14-1107.

On the theory of completely regular spaces. Moskov. Gos. Univ. Uč. Zap. 155, Mat. 5 (1952), 137-155. (Russian) (E. Hewitt) 17-990.

Remark on the work, "On a problem connected with the metrization of topological spaces." Ukrain. Mat. Ž. 4 (1952), 220-223. (Russian) (E. Hewitt) 17-990.

Intorno alle funzioni monogene di una classe speciale di variabile ipercomplessa introdotte dal Valerias. *Boll. Un. Mat. Ital.* (2) 2, 348-349 (1940). 2-87.

Sulla caratterizzazione geometrica delle varietà caratteristiche e pseudocaratteristiche dello spazio reale euclideo. *Univ. Roma e Ist. Naz. Alta Mat. Rend. Mat. e Appl.* (5) 1, 255-262 (1940). (Thullen) 9-26.

Sulle funzioni in un'algebra complessa dotata di modulo. Applicazioni alle algebre dei ternioni, dei numeri triduali e dei numeri tripotenziali. *Univ. Roma e Ist. Naz. Alta Mat. Rend. Mat. e Appl.* (5) 2, 193-231 (1941). (Kaplansky) 8-250.

Caratterizzazione delle funzioni di variabile ipercomplessa analitiche secondo Ringleb fra le funzioni a derivata caratteristica. *Atti Secondo Congresso Un. Mat. Ital.*, Bologna, 1940, pp. 91-95. Edizioni Cremonense, Roma, 1942. (Kaplansky) 8-250.

Il teorema fondamentale dell'algebra per una qualunque algebra complessa dotata di modulo. *Atti Secondo Congresso Un. Mat. Ital.*, Bologna, 1940, pp. 96-104. Edizioni Cremonense, Roma, 1942. (Kaplansky) 8-251.

Le riemanniane degli S_r ipercomplessi. *Rend. Accad. Sci. Fis. Mat. Napoli* (4) 13, 23-46 (1945). 8-224.

La varietà W_4^6 dell' S_3 complesso riemanniana del piano biduale. *Rend. Accad. Sci. Fis. Mat. Napoli* (4) 13, 128-141 (1945). 8-224.

Lezioni di geometria superiore. Vol. VII. Elementi di geometria algebrica e corpoproiettività sopra una varietà. Le superficie di Riemann e gli integrali abeliani. Casa Editrice Raffaele Pironti e Figli, Napoli, 1950. 616 pp. 18-68.

Le catene t -dimensionali e la geometria corpoproiettiva nell' S_r ipercomplesso di 1^a specie sinistro o destro, legato ad un'algebra dotata di modulo e definita in un qualunque corpo numerico. *Rend. Accad. Sci. Fis. Mat. Napoli* (4) 16 (1949), 10-13 (1950). 16-397.

Le geometrie fondamentali, che generalizzano le geometrie non euclidee, in un S_r ipercomplesso. *Rend. Accad. Sci. Fis. Mat. Napoli* (4) 16 (1949), 169-176 (1950). 16-397.

Corpovarietà e varietà algebriche ed iperalgebriche di un S_r ipercomplesso. *Rend. Accad. Sci. Fis. Mat. Napoli* (4) 17 (1950), 114-117 (1951). 16-397.

Sulle rappresentazioni complesse di una corpo-varietà algebrica o iperalgebrica e delle trasformazioni corpobirazionali di un S_r legato ad una qualunque algebra complessa. *Rend. Accad. Sci. Fis. Mat. Napoli* (4) 17 (1950), 230-238 (1951). 16-397.

Le tre rappresentazioni reali del piano proiettivo complesso e delle catene tridimensionali. *Ricerca, Napoli* 1, no. 1, 6-14, no. 2-3, 3-9, no. 4, 9-16 (1950); 2, no. 1, 1-8, no. 2, 3-10 (1951). (Moufang) 13-969.

Sulle estensioni della geometria dei raggi reciproci del Klein. *Ricerca, Napoli* 2, no. 3-4, 10-13 (1951). (Moufang) 13-969.

Lezioni di geometria superiore. Vol. VIII. Enti iperalgebrici e geometrie fondamentali nell' S_2 complesso. Rappresentazioni complesse delle corpoproiettività dell' S_1 biduale. Derivazione ed integrazione nel campo ipercomplesso. Casa Editrice Raffaele Pironti e Figli, Napoli, 1952. 676 pp. 18-68.

Teoremi fondamentali sulle falde bidimensionali con l'origine in un punto o in una curva. *Giorn. Mat. Battaglini* (5) 1 (81), 70-84 (1952). (Muhly) 14-1011.

Ipersuperficie e t -ipersuperficie di un S_r ipercomplesso. *Rend. Accad. Sci. Fis. Mat. Napoli* (4) 18 (1951), 192-198 (1952). 16-397.

Forma esplicita delle funzioni $\sin \xi$, $\cos \xi$, e^ξ nel campo ipercomplesso. *Rend. Accad. Sci. Fis. Mat. Napoli* (4) 18 (1951), 219-226 (1952). (Kaplansky) 14-346.

Rappresentazioni complesse delle trasformazioni birazionali di un S_r ipercomplesso. *Ricerca, Napoli* 3, no. 1, 8-12 (1952). 13-865.

Le varietà dell' S_5 complesso determinate da una curva algebrica piana. *Ricerca, Napoli* 3, no. 3-4, 3-16 (1952). (Huff) 14-1116.

Le algebre complesse, commutative, dotate di modulo. *Ricerche Mat.* 1, 3-19 (1952). (Kaplansky) 14-8.

Le funzioni totalmente derivabili nelle algebre complesse, dotate di modulo, commutative del quarto ordine. *Ricerche Mat.* 1, 145-166 (1952). (Kaplansky) 14-8.

Le funzioni totalmente derivabili nell'algebra dei numeri n -potenziali. *Atti del Quarto Congresso dell'Unione Matematica Italiana, Taormina*, 1951, vol. II, pp. 220-231. Edizioni Cremonense, Roma, 1953. 16-989.

Sull'estensione del teorema di Lüroth dall' S_1 complesso ad un S_1 ipercomplesso. *Atti Accad. Ligure* 9 (1952), 36-39 (1953). (d'Orgeval) 15-154.

Trasformazione birazionale determinata da una ipersuperficie dell' S_r complesso per lo scioglimento delle sue singolarità. *Giorn. Mat. Battaglini* (5) 1(81), 113-122 (1953). 15-462.

Effettiva determinazione di una trasformazione birazionale trasformante una data ipersuperficie dell' S_r in una varietà dell' S_{r+2} priva di punti multipli. *Giorn. Mat. Battaglini* (5) 1(81), 123-152 (1953). 15-462.

Sull'estensione del teorema di Lüroth dall' S_1 complesso ad un S_1 ipercomplesso. *Rend. Accad. Sci. Fis. Mat. Napoli* (4) 19 (1952), 190-193 (1953). 15-462.

Nozioni introduttive alla teoria delle ipersuperficie algebriche di indice n dell' S_r proiettivo complesso. *Rend. Accad. Sci. Fis. Mat. Napoli* (4) 19 (1952), 198-199 (1953). 15-462.

Le varietà dell' S_{11} complesso determinate da una superficie algebrica dell' S_3 complesso. *Ricerca, Napoli* 4, no. 1-2, 3-10 (1953). 15-59.

Le varietà dell' S_5 determinate da una coppia ordinata di curve algebriche del piano complesso. *Ricerca, Napoli* 4, no. 3-4, 3-11 (1953). 15-551.

Punti fondamentali e semifondamentali di una trasformazione birazionale di un S_r supercomplesso. *Ricerche Mat.* 2, 3-25 (1953). 16-397.

Il teorema fondamentale sulle condizioni di razionalità di una superficie biduale, triduale, n -duale. *Giorn. Mat. Battaglini* (5) 2(82), 277-295 (1954). (Huff) 16-65.

Un modello proiettivo dell'ente algebrico ∞^{r-1} dell' S_r complesso ottenuto con l'algebra dei numeri $(r+1)$ -duali. *Giorn. Mat. Battaglini* (5) 2(82), 359-377 (1954). (Huff) 17-411.

Nozioni introduttive alla teoria delle ipersuperficie algebriche di indice n , dell' S_r proiettivo complesso. I, II, III, IV, V, VI, VII, VIII, IX, X, XI. *Rend. Accad. Sci. Fis. Mat. Napoli* (4) 14 (1946-47), 1-10, 141-150 (1948); 15 (1948), 13-18, 84-87 (1949); 16 (1949), 4-10 (1950); 17 (1950), 41-47 (1951); 18 (1951), 12-17, 259-264 (1952); 19 (1952), 98-103, 198-199 (1953); 20 (1953), 284-292 (1954). 16-396.

Le varietà determinate da una coppia ordinata di ipersuperficie dell' S_r complesso. *Rend. Accad. Sci. Fis. Mat. Napoli* (4) 20 (1953), 65 (1954). (Togliatti) 16-614.

Le falde t -dimensionali analitiche, algebriche ed unirazionali di un S_r supercomplesso. *Rend. Accad. Sci. Fis. Mat. Napoli* (4) 20 (1953), 147-152 (1954). 16-510.

Sulle singolarità degli zeri di una funzione supercomplessa. *Rend. Accad. Sci. Fis. Mat. Napoli* (4) 20 (1953), 316-323 (1954). (Ketchum) 16-1014.

Su alcune varietà dell' S_{11} determinate dall'algebra triduale come sottoalgebra dell'algebra dei numeri doppio-biduali. Rend. Accad. Sci. Fis. Mat. Napoli (4) 21, 10-24 (1954). (G. B. Huff) 17-663.

Su alcune varietà dell' S_{23} complesso determinate dall'algebra dei numeri quadriduali come sottoalgebra dei numeri triplo-biduali. Rend. Accad. Sci. Fis. Mat. Napoli (4) 21, 57-78 (1954). (G. B. Huff) 17-663.

Sulla V_8^7 dell' S_{11} contenente tutte le $V_6^{2(n+m)}$ rispondenti alle curve di ordine n e classe m dell' S_2 . Rend. Accad. Sci. Fis. Mat. Napoli (4) 21, 157-165 (1954). (G. B. Huff) 17-663.

La varietà V_{22} dell' S_{39} complesso determinata da una V_3^n dell' S_4 prolungata nell' S_4 cinqueduale. Rend. Accad. Sci. Fis. Mat. Napoli (4) 21, 181-196 (1954). (G. B. Huff) 17-663.

Le superficie iperellittiche dell' S_3 biduale e la loro rappresentazione con varietà V_5 dell' S_7 complesso. Rend. Mat. e Appl. (5) 14, 164-180 (1954). 16-510.

La risoluzione delle equazioni algebriche del secondo e terzo grado nel campo biduale e tripotenziale. Ricerca, Napoli 5 (1954), nos. 1-2, 15-26; no. 3, 12-22; no. 4, 13-17. 17-821.

Le curve ellittiche di un S_r supercomplesso. Ricerche Mat. 2 (1953), 204-240 (1954). (Huff) 16-397.

Varietà determinata da una terna ordinata di ipersuperficie dell' S_r complesso nell' S_{3r+2} . Ricerche Mat. 3, 13-30 (1954). (Huff) 16-510.

La 1^a rappresentazione complessa della ipersuperficie generale dell' S_r quadripotenziale. Ricerche Mat. 3, 172-188 (1954). (G. B. Huff) 17-410.

Teoremi relativi alle ipersuperficie dell' S_r m -potenziale. Matematiche, Catania 10 (1955), 1-14. 17-663.

Rappresentazione in S_5 di un fascio di curve e della serie lineare secata su una curva complessa prolungata nel campo biduale. Ricerca, Napoli 6, no. 1, 18-25 (1955). 17-85.

Rappresentazione in S_5 di un fascio di curve e della serie lineare secata su una curva complessa prolungata sul campo biduale. Ricerca, Napoli 6 (1955), no. 2, 10-19. 17-1006.

La varietà dell' S_{11} determinata da una superficie algebrica dell' S_3 complesso. Ricerca, Napoli 6 (1955), no. 3, 9-16. 17-1006.

Rappresentazioni complesse di superficie biduali prolungamento di superficie complesse. Ricerche Mat. 4 (1955), 30-47. (D. Gallarati) 17-896.

Sull'invarianza birazionale dell'intersezione di una falda bidimensionale con una superficie. Ricerche Mat. 4 (1955), 126-149. (G. B. Huff) 17-1240.

Sulle falde di Halphen. Ricerche Mat. 4 (1955), 191-206. (G. B. Huff) 17-1240.

Curve e superficie osculatrici principali, a contatto tripunto o quadripunto, ad una falda di S_3 con l'origine in un punto o in curva. Giorn. Mat. Battaglini (5) 3(83) (1955), 41-53, 157-187 (1956). 17-1006.

Prolungamento di una falda dell' S_3 complesso nell'algebra dei numeri triduali. Giorn. Mat. Battaglini (5) 4(84) (1956), 49-67. 18-335.

Il genere di una curva algebrica di S_r in funzione del carattere cuspidale e dell'ordine completo della curva. Giorn. Mat. Battaglini (5) 4(84) (1956), 145-149. 18-415.

Involuppo e congruenza delle tangenti ai rami di una falda bidimensionale piana o tridimensionale dell' S_3 . Rend. Accad. Sci. Fis. Mat. Napoli (4) 22 (1955), 62-66 (1956). 18-68.

Prolungamento di una ipersuperficie dell' S_r complesso nel campo quadripotenziale. Rend. Accad. Sci. Fis. Mat. Napoli (4) 22 (1955), 67-74 (1956). 18-69.

Sulle condizioni di razionalità per una superficie tripotenziale. Rend. Accad. Sci. Fis. Mat. Napoli (4) 22 (1955), 75-93 (1956). 18-69.

Carattere singolare e carattere cuspidale di una curva algebrica completa. Rend. Accad. Sci. Fis. Mat. Napoli (4) 22 (1955), 123-143 (1956). 18-69.

Le falde tridimensionali dell' S_5 determinate dai rami lineari

e superlineari di una curva algebrica completa. Rend. Accad. Sci. Fis. Mat. Napoli (4) 22 (1955), 202-220 (1956). 18-69.

Rappresentazione in S_5 del piano complesso completo e relativo gruppo di trasformazioni birazionali. Rend. Accad. Sci. Fis. Mat. Napoli (4) 22 (1955), 249-261 (1956). 18-69.

Relazione fra le proprietà di contatto e di osculazione di una curva o superficie con le algebre dei numeri biduali, triduali e tripotenziali. Ricerca, Napoli 6 (1955), no. 4, 3-10 (1956). 18-415.

La V_5 di S_8 determinata dalle coniche osculatrici di una curva algebrica piana prolungata nel campo tripotenziale. I. Ricerca, Napoli 7 (1956), 43-58. 18-415.

La superficie approssimante una falda di Halphen nell'intorno dell' n -mo ordine del suo punto origine. Ricerche Mat. 5 (1956), 226-238. 18-822.

La varietà dell' S_{19} determinata da una superficie algebrica dell' S_3 complesso prolungata in un'algebra del 5° ordine. Giorn. Mat. Battaglini (5) 5(85) (1957), 31-40. 19-880.

Carattere singolare e cuspidale di una curva storta completa. Rend. Accad. Sci. Fis. Mat. Napoli (4) 23 (1956), 10-16 (1957). 19-318.

Rappresentazione nell' S_{2r+1} complesso di una serie lineare, secata su una curva dell' S_r complesso da un fascio di ipersuperficie prolungata nel campo biduale. Rend. Accad. Sci. Fis. Mat. Napoli (4) 23 (1956), 17-32 (1957). 19-318.

Sui punti ipercomplessi di una ipersuperficie algebrica ordinaria dell' S_3 complesso. Rend. Accad. Sci. Fis. Mat. Napoli (4) 23 (1956), 60-72 (1957). 19-318.

Curve algebriche complete autoduali. Rend. Accad. Sci. Fis. Mat. Napoli (4) 23 (1956), 109-117 (1957). 19-318.

Sulle curve osculatrici di un ramo lineare o superlineare di una curva algebrica. Rend. Accad. Sci. Fis. Mat. Napoli (4) 23 (1956), 118-124 (1957). 19-318.

La V_8 di S_{11} determinata dalle coniche osculatrici ad una superficie algebrica di S_3 prolungata nel campo tripotenziale. Rend. Accad. Sci. Fis. Mat. Napoli (4) 24 (1957), 9-23. 20 #3137.

Rappresentazione in S_{11} delle reti di sezioni piane di una superficie completa e delle relative curve jacobiane. Rend. Accad. Sci. Fis. Mat. Napoli (4) 24 (1957), 30-58. 20 #3138.

Sulla prima curva osculatrice di un ramo superlineare di una curva algebrica piana completa. I, II. Rend. Accad. Sci. Fis. Mat. Napoli (4) 24 (1957), 76-96. 20 #3139.

La varietà di S_{11} determinata da una superficie algebrica come insieme dei suoi flessi. Rend. Accad. Sci. Fis. Mat. Napoli (4) 24 (1957), 104-112. 20 #3140.

Sui numeri bicomplexi di Corrado Segre. Rend. Accad. Sci. Fis. Mat. Napoli (4) 24 (1957), 118-121. 20 #3178.

Su una superficie di ordine 9 e classe 9 dotata di un fascio lineare di cubiche autoduali. Ricerca, Napoli (2) 8 (1957), Luglio-Dicembre, 8-16. 19-1195.

Sulle V_8 di S_{11} determinate da una falda di Halphen di una superficie completa. Ricerche Mat. 6 (1957), 67-95. (P. Du Val) 20 #4552.

Sulla superficie di ordine $(n+v)^2$ che oscula nel punto origine una falda di Halphen di ordine n e classe v . Ricerche Mat. 6 (1957), 195-204. (P. Du Val) 20 #4553.

On the gravitational oscillations of gaseous spheres.

J. Appl. Math. Mech. [Akad. Nauk SSSR. Zhurnal Prikl. Mat. Mech.] (N. S.) 4, no. 5-6, 87-104 (1940). (Russian, English summary) 2-331.

The flow of gas jets around a plane contour. Bull. Acad. Sci. URSS. Cl. Sci. Tech. [Izvestia Akad. Nauk SSSR] 1945, 622-637 (1945). (Russian) (Bergman) 8-417.

On the waves produced by a ship moving in a circular path. Bull. Acad. Sci. URSS. Cl. Sci. Tech. [Izvestia Akad. Nauk SSSR] 1946, 13-22 (1 plate) (1946). (Russian) 8-111.

Sur la démonstration du théorème de Hilbert-Schmidt. C. R. (Doklady) Acad. Sci. URSS (N. S.) 52, 194-197 (1946). (Smithies) 8-467.

Theory of tides of long period. Bull. Acad. Sci. URSS. Sér. Géograph. Géophys. [Izvestia Akad. Nauk SSSR] 11, 197-270 (1947). (Russian, English summary) (Milne-Thomson) 9-118.

On annular waves on the surface of a rotating fluid. Izvestiya Akad. Nauk SSSR. Otd. Tehn. Nauk 1949, 5-18 (1949). (Russian) (Wehausen) 10-646.

On the waves generated by an underwater source under the surface of a sphere. Izvestiya Akad. Nauk SSSR. Ser. Geograf. Geofiz. 13, 473-496 (1949). (Russian) (Wehausen) 11-480.

The plane problem of the propagation of waves in a basin, excited by an underwater source. Izvestiya Akad. Nauk SSSR. Otd. Tehn. Nauk 1950, 321-332 (1950). (Russian) (Wehausen) 11-624.

Refraction and reflection of plane waves in liquids at a transition from one depth to another. Izvestiya Akad. Nauk SSSR. Otd. Tehn. Nauk 1950, 1601-1614 (1950). (Russian) (Wehausen) 12-551.

The oscillation of a fluid in a movable basin. Izvestiya Akad. Nauk SSSR. Otd. Tehn. Nauk 1951, 1483-1494 (1951). (Russian) (Wehausen) 13-504.

Survey of works on the theory of waves during the time from 1917 to 1949. Moskov. Gos. Univ. Učeny Zapiski 152, Mehanika 3, 76-98 (1951). (Russian) (Wehausen) 14-508.

Propagation of waves from a sounding disc. Moskov. Gos. Univ. Učeny Zapiski 154, Mehanika 4, 275-285 (1951). (Russian) (Torraldo di Francia) 14-428.

On a method of determination of waves of finite amplitude. Izvestiya Akad. Nauk SSSR. Otd. Tehn. Nauk 1952, 688-698 (1952). (Russian) (Wehausen) 14-423.

On waves on the surface of separation of two flows of a liquid flowing at an angle to each other. Izvestiya Akad. Nauk SSSR. Otd. Tehn. Nauk 1952, 1782-1787 (1952). (Russian) (Wehausen) 15-70.

Motion of a cylinder under the surface of a heavy fluid. NACA Tech. Memo. no. 1335, 37 pp. (1952). 14-508.

The propagation of elastic waves arising from the motion of a system of normal stresses on the surface of a half-space. Trudy Moskov. Mat. Obšč. 1, 167-186 (1952). (Russian) (Kostitzin) 14-820.

Spatial problem of determination of steady waves of finite amplitude. Doklady Akad. Nauk SSSR (N. S.) 89, 25-28 (1953). (Russian) (Wehausen) 15-70.

The scientific production of S. A. Čaplygin. Izvestiya Akad. Nauk SSSR. Otd. Tehn. Nauk 1953, 106-108 (1 plate) (1953). (Russian) 14-609.

Motion of the Goryačev-Čaplygin gyroscope. Izvestiya Akad. Nauk SSSR. Otd. Tehn. Nauk 1953, 109-119 (1953). (Russian) (Leimanis) 14-1024.

Waves of finite amplitude arising from a periodically distributed pressure. Izvestiya Akad. Nauk SSSR. Otd. Tehn. Nauk 1953, 505-511 (1953). (Russian) (Wehausen) 15-362.

Remarks on a posthumous work of N. N. Luzin on integration of the equations of deformation of surfaces with preservation of a conjugate net. Uspehi Matem. Nauk (N. S.) 8, no. 2(54), 75-82 (1953). (Russian) (Busemann) 15-158.

The motion of three particles on rotating orbits. Vestnik Moskov. Univ. Ser. Fiz.-Mat. Estest. Nauk 8, no. 2, 15-19 (1953). (Russian) (Leimanis) 15-653.

On the uniqueness of determination of the form of an attracting body from the values of its external potential. Doklady Akad. Nauk SSSR (N. S.) 99, 21-22 (1954). (Russian) (Maruhn) 16-699.

Propagation of sound in an isothermal atmosphere. Izvestiya Akad. Nauk SSSR. Ser. Geofiz. 1954, 134-142 (1954). (Russian) (Kiveliovitch) 16-196.

The motion of a vibrator under the surface of a fluid. Trudy Moskov. Mat. Obšč. 3, 3-14 (1954). (Russian) (Wehausen) 16-188.

The spatial problem of steady waves of finite amplitude. Vestnik Moskov. Univ. Ser. Fiz.-Mat. Estest. Nauk 9, no. 5, 3-12 (1954). (Russian) (Wehausen) 16-297.

On directed emission of waves from a region subjected to external pressure. Prikl. Mat. Meh. 20 (1956), 349-361. (Russian) (R. N. Goss) 18-165.

On the theory of gas jets. Soviet Physics. Dokl. 119 (3) (1958), 252-254 (1113-1114 Dokl. Akad. Nauk SSSR). (T. M. Cherry) 20 #6897.

On the origin of the solar system. *Akad. Nauk SSSR. Astr. Žurnal* 29, 288-305 (1952). (Russian) (Langebartel) 14-96.

A new approximate method of integration of some equations of hyperbolic type. *Doklady Akad. Nauk SSSR (N. S.)* 93, 979-982 (1953). (Russian) (Giese) 15-661.

General solutions of the equations of gas dynamics for one-dimensional motions for a certain given equation of state or process. *Doklady Akad. Nauk SSSR (N. S.)* 96, 441-444 (1954). (Russian) (Giese) 16-301.

Neustanovivšiesya dviženiya splošnoy sredy. [Unsteady motion of a continuous medium.] *Gosudarstv. Izdat. Tehn.-Teor. Lit.*, Moscow, 1955. 804 pp. (M. Holt) 18-440.

Some results in the field of relativistic magneto-gas dynamics. *Dokl. Akad. Nauk SSSR (N. S.)* 103, 73-76 (1955). (Russian) (S. Chandrasekhar) 18-623.

Elements of relativistic magneto-gas-dynamics. *Izv. Akad. Nauk SSSR. Ser. Fiz.* 19 (1955), 639-650. (Russian) (S. Chandrasekhar) 18-623.

Some unsteady two- and three-dimensional gas flows. *Dokl. Akad. Nauk SSSR (N. S.)* 112 (1957), 595-598. (Russian) (J. H. Giese) 19-1006.

Stapan, A. È. (=Stapans)

On nonlinear integral equations with a discrete spectrum of characteristic values. *Latvijas PSR Zinātņu Akad. Vēstis* 1951, no. 4 (45), 643-650 (1951). (Russian, Latvian summary) (Smithies) 14-766.

Stapp, Henry P.

Relativistic theory of polarization phenomena. *Phys. Rev.* (2) 103 (1956), 425-434. (A. S. Wightman) 18-625.

Starček, Imrich.

A plane light wave in a totally anisotropic nonconducting medium. *Mat.-Fyz. Sbornik Slovensk. Akad. Vied Umení* 1, 18-30 (1951). (Slovak, Russian and French summaries) (Atkinson) 16-97.

Starikin, Yu. A.

Conservation laws in Dirac's theory. *Akad. Nauk SSSR. Zhurnal Eksper. Teoret. Fiz.* 19, 749-752 (1949). (Russian) (Dyson) 11-300.

Starikova, M. V.

On the investigation of self-oscillations and stability of automatic systems with non-symmetric non-linearity with external exciting force. *Izv. Akad. Nauk SSSR. Otd. Tehn. Nauk* 1957, no. 9, 27-32. (Russian) (J. P. LaSalle) 20 #799.

Staring, A. J.

On central motions, in particular that along an ellipse. *Simon Stevin* 25, 208-223 (1947). (Dutch) (Bottema) 10-71.

Stark, J. M.

On distortion in pseudo-conformal mapping. *Pacific J. Math.* 6 (1956), 565-582. (H. J. Bremermann) 18-474.

Stark, Marcell. (See also Mostowski, Andrzej)

On a functional equation. *Colloquium Math.* 1, 230-231 (1948). (Boas) 10-303.

On a ratio test of Frink. *Colloquium Math.* 2, 46-47 (1949). (Frink) 12-604.

Geometria analityczna ze szczególnym uwzględnieniem podręcznika Eustachego Żylińskiego. [Analytic Geometry with Particular Regard to the Textbook of Eustachy Żyliński.] *Monografie Matematyczne. Tom XXVI. Polskie Towarzystwo Matematyczne.*, Warszawa-Wrocław, 1951. viii + 629 pp. (Hlavatý) 13-375.

Geometria analityczna. [Analytic geometry.] 2nd ed., revised. *Biblioteka Matematyczna, Vol. 17.* Państwowe Wydawnictwo Naukowe, Warsaw, 1958. 416 pp. (N. A. Court) 20 #2660.

Stark, Richard H.

On the representation of a function as a Hellinger integral. *Bull. Amer. Math. Soc.* 55, 155-159 (1949). (de Possel) 10-520.

Rates of convergence in numerical solution of the diffusion equation. *J. Assoc. Comput. Mach.* 3 (1956), 29-40. 17-668.

Starkey, B. J.

Laplace transforms for electrical engineers. *Iliffe & Sons, Ltd.*, London, 1954; *Philosophical Library*, New York, 1955. 279 pp. (R. V. Churchill) 17-33.

Starkey, D. M.

The distribution of the multiple correlation coefficient in periodogram analysis. *Ann. Math. Statistics* 10, 327-336 (1939). (Dodd) 1-152.

On a theorem of Hardy-Littlewood. *Kōdai Math. Sem. Rep.* 1951, 52-54 (1951). (Bosanquet) 13-836.

On the Walsh-Kaczmarz series. *Proc. Amer. Math. Soc.* 2, 5-11 (1951). (Rogosinski) 12-821.

Notes on Fourier analysis. XXXIX. *Tōhoku Math. J. (2)* 3, 71-88 (1951). (Zygmund) 12-696.

Notes on Fourier analysis. XLIV. On the summation of Fourier series. *Tōhoku Math. J. (2)* 3, 114-122 (1951). (Bosanquet) 13-228.

Harmonic analysis and Wiener integrals. *Tōhoku Math. J. (2)* 3, 187-196 (1951). (Cameron) 13-754.

Notes on Fourier analysis. XLVI. A convergence criterion for Fourier series. *Tōhoku Math. J. (2)* 3, 216-219 (1951). (Bosanquet) 13-739.

A class of singular integral equations. *Tōhoku Math. J. (2)* 3, 220-222 (1951). (Reuter) 13-752.

Convergence criteria for Fourier series. *Tōhoku Math. J. (2)* 4, 187-193 (1952). (Civin) 14-552.

Supplementary list of mathematical publications by Prof. M. Fujiwara. *Tōhoku Math. J. (2)* 4, 316-317 (1952). 14-832.

Integrability of trigonometric series. *J. Math. Tokyo* 1, 99-103 (1953). (Boas) 16-240.

Notes on Fourier analysis. XLVII. Convexity theorems and Cesàro summability of Fourier series. *J. Math., Tokyo* 1, 104-109 (1953). (L. S. Bosanquet) 16-1100.

A Fourier series which belongs to the class H diverges almost everywhere. *Kōdai Math. Sem. Rep.* 1953, 27-28 (1953). (Civin) 15-27.

Tauberian theorems for Riemann summability. *Tōhoku Math. J. (2)* 5, 34-42 (1953). (Agnew) 15-304.

Corrections to the paper "Tauberian theorems for Riemann summability." *Tōhoku Math. J. (2)* 5, 189 (1953). 15-787.

Cesàro summability of Fourier series. *Tōhoku Math. J. (2)* 5, 198-210 (1953). (Civin) 15-788.

On the absolute summability factors. *Kōdai Math. Sem. Rep.* 1954, 59-62 (1954). (Bosanquet) 16-464.

A new convergence criterion for Fourier series. *Tōhoku Math. J. (2)* 5, 238-242 (1954). (Klein) 16-240.

On the strong summability of power series and Fourier series. *Tōhoku Math. J. (2)* 6, 220-225 (1954). (Civin) 16-919.

On the summability of power series and Fourier series. *Tōhoku Math. J. (2)* 7 (1955), 96-109. (P. Civin) 17-361.

Theorems on power series of the class HP . *Tōhoku Math. J. (2)* 8 (1956), 125-146. (E. Stein) 18-889.

Errata "Cesàro summability of Fourier series". This journal, vol. 5 (1953), 193-210. *Tōhoku Math. J. (2)* 8 (1956), 147. (P. Civin) 18-208.

Some theorems on fractional integration. *Tōhoku Math. J. (2)* 9 (1957), 307-317. (E. M. Stein) 20 #7191.

---- and Tsuchikura, Tamotsu.

Absolute regularity for convergent integrals. *Tōhoku Math. J. (2)* 4, 153-156 (1952). (Lorentz) 14-551.

---- and Utagawa, Masatomo.

The generalized Perron integrals. *Tōhoku Math. J. (2)* 1, 95-99 (1949). (Jeffery) 11-90.

---- and Watari, Chinami.

On determination of the class of saturation in the theory of approximation of functions. *Proc. Japan Acad.* 34 (1958), 477-481. (E. M. Stein) 20 #7183.

---- and Yano, Shigeki.

Modelling in an electrolytic bath of some special cases of the Poisson equation. *Latvijas PSR Zinātņu Akad. Vēstis* 1956, no. 4(105), 145-148. (Russian, Latvian summary) (C. Saltzer) 18-831.

Tabata, Fujio. (=Tabata, Fuzio)

On the properties of a Riemannian space with a parameter $\mathfrak{E}(t)$ projected its tangent space. *Bull. Kyoto Gakugei Univ. Ser. B*, no. 5 (1954), 16-21. (A. Kawaguchi) 20 #7306a.

On the "relative rotation" in the field of orthogonal ennupie formed of principal directions in a "Riemannian space with a parameter" $\mathfrak{E}(t)$. *Bull. Kyoto Gakugei Univ. Ser. B*, no. 6 (1955), 21-29. (A. Kawaguchi) 20 #7306b.

Kinematic interpretation of Riemannian geometry with parameter. *Bull. Kyoto Gakugei Univ. Ser. B*, no. 7 (1955), 31-34. (Russian, Japanese summary) (A. Kawaguchi) 20 #7306c.

On the proper change of "curvatures" of a "proper" hypersurface in a "Riemannian space with a parameter $\mathfrak{E}(t)$ ". *Bull. Kyoto Gakugei Univ. Ser. B*, no. 9 (1956), 6-11. (A. Kawaguchi) 20 #7306d.

Tabellini, Paola.

Su una guida d'onda con uno schermo conduttore. *Atti Sem. Mat. Fis. Univ. Modena* 6 (1951-52), 87-97 (1953). (Copson) 16-98.

Taberski, R.

On singular integrals. *Ann. Polon. Math.* 4 (1958), 249-268. (J. G. Herriot) 20 #1891.

Tables.

Table of the First Ten Powers of the Integers from 1 to 1000. Published under the sponsorship of the National Bureau of Standards as a report of Official Project No. 365-97-3-11, conducted under the auspices of the United States Works Progress Administration for the City of New York, 1939. viii + 80 pp. (Lehmer) 2-64.

Tables of Circular and Hyperbolic Sines and Cosines for Radian Arguments. Prepared by Federal Works Agency, Work Projects Administration for the City of New York, as a Report of Official Project No. 765-97-3-10; conducted under the sponsorship of the National Bureau of Standards. Technical Director: Arnold N. Lowan. New York, 1939. xvii + 405 pp. (Caldwell) 2-64.

Tables of the Exponential Function e^x . Federal Works Agency, Work Projects Administration for the City of New York, as a Report of Official Project No. 765-97-3-10. Conducted under the Sponsorship of the National Bureau of Standards, 1939. Introduction and 535 pp. (Ketchum) 2-64.

Tables of Sines and Cosines for Radian Arguments. Prepared by the Federal Works Agency, Work Projects Administration for the City of New York, as a Report of Official Project No. 765-97-3-10; conducted under the sponsorship of the National Bureau of Standards. Technical Director: Arnold N. Lowan. New York, 1940. xix + 275 pp. (Moulton) 2-64.

Tables of Sine, Cosine and Exponential Integrals. Vol. I. Prepared by the Federal Works Agency, Work Projects Administration for the City of New York, as a Report of Official Project No. 765-97-3-10; conducted under the sponsorship of the National Bureau of Standards. Technical Director:

Arnold N. Lowan. New York, 1940. xxvi + 444 pp. (Milne) 2-239.

Tables of Sine, Cosine and Exponential Integrals. Vol. II. Prepared by the Federal Works Agency, Work Projects Administration for the City of New York, as a Report of Official Project No. 765-97-3-10; conducted under the sponsorship of the National Bureau of Standards. Technical Director: Arnold N. Lowan. New York, 1940. xxxvii + 225 pp. (Milne) 2-366.

Table of Natural Logarithms. Vols. I, II. Prepared by the Federal Works Agency, Work Projects Administration for the City of New York, as a Report of Official Project Nos. 765-97-3-10, 65-2-97-33; conducted under the sponsorship of the National Bureau of Standards. Technical Director: Arnold N. Lowan. New York, 1941. xviii + 501 pp. each. 2-366.

Tables of Probability Functions. Vol. I. Prepared by the Federal Works Agency, Work Projects Administration for the City of New York, as a Report of Official Project No. 65-2-97-33; conducted under the sponsorship of the National Bureau of Standards. Technical Director: Arnold N. Lowan. New York, 1941. xxviii + 302 pp. (Feller) 3-5.

Table of Natural Logarithms. Vol. III. Prepared by the Federal Works Agency, Work Projects Administration for the City of New York, as a Report of Official Project No. 65-2-97-33; conducted under the sponsorship of the National Bureau of Standards. Technical Director: Arnold N. Lowan. New York, 1941. xviii + 501 pp. 3-152.

Table of Natural Logarithms. Vol. IV. Prepared by the Federal Works Agency, Work Projects Administration for the City of New York, as a Report of Official Project No. 65-2-97-33; conducted under the sponsorship of the National Bureau of Standards. Technical Director: Arnold N. Lowan. New York, 1941. xxii + 506 pp. 3-275.

Tables of the Moment of Inertia and Section Modulus of Ordinary Angles, Channels, and Bulb Angles with Certain Plate Combinations. Prepared by the Federal Works Agency, Work Projects Administration for the City of New York, as a Report of Official Project No. 165-2-97-22, Mathematical Tables Project; conducted under the sponsorship of the National Bureau of Standards. Technical Director: Arnold N. Lowan. New York, 1941. xiii + 197 pp. 3-275.

Miscellaneous Physical Tables. Planck's Radiation Functions and Electronic Functions. Prepared by the Federal Works Agency, Work Projects Administration for the City of New York, as a Report of Official Project No. 65-2-97-33; conducted under the sponsorship of the National Bureau of Standards. Technical Director: Arnold N. Lowan. New York, 1941. vi + 58 pp. (Chandrasekhar) 4-282.

Natural Sines and Cosines to Eight Decimal Places. U.S. Dept. Commerce, Coast and Geodetic Survey, Special Publ. no. 231. United States Government Printing Office, Washington, D. C., 1942. 541 pp. 3-275.

Tables of Probability Functions. Vol. II. Prepared by the Federal Works Agency, Work Projects Administration for the City of New York, as a Report of Official Project No. 165-2-97-22; conducted under the sponsorship of the National Bureau of Standards. Technical Director: Arnold N. Lowan. New York, 1942. xxi + 344 pp. (Feller) 4-19.

Table of arc tan x . Prepared by the Federal Works Agency, Work Projects Administration for the City of New York as a Report of Official Project No. 165-2-97-22; conducted under the sponsorship of the National Bureau of Standards. Technical Director: Arnold N. Lowan. New York, 1942. xxv + 169 pp. (Feller) 4-89.

Table of 5-Point Lagrangean Interpolation Coefficients. (From 0 to 2, Argument 0.001, 7-place.) Marchant Calculating Machine Company, Oakland, Calif., 1942. 25 pp. 4-89.

Table of Sine and Cosine Integrals for Arguments from 10 to 100. Prepared by the Federal Works Agency, Work Projects Administration for the City of New York, as a Report of Official Project No. 265-2-97-11; conducted under the sponsorship of the National Bureau of Standards. Technical Director:

Arnold N. Lowan. New York, 1942. xxxii + 185 pp. (Milne) 4-89.

Table of Circular and Hyperbolic Tangents and Cotangents for Radian Arguments. Prepared by the Federal Works Agency, Work Projects Administration; conducted under the sponsorship of the National Bureau of Standards. Technical Director: Arnold N. Lowan. Columbia University Press, New York, 1943. xxxviii + 410 pp. (Feller) 5-159.

Table of Reciprocals of the Integers from 100,000 Through 200,009. Prepared by the Federal Works Agency, Work Projects Administration; conducted under the sponsorship of the National Bureau of Standards. Technical Director: Arnold N. Lowan. Columbia University Press, New York, 1943. viii + 201 pp. (W. E. Milne) 5-159.

Table of the Bessel Functions $J_0(z)$ and $J_1(z)$ for Complex Arguments. Prepared by the Federal Works Agency, Work Projects Administration; conducted under the sponsorship of the National Bureau of Standards. Technical Director: Arnold N. Lowan. Columbia University Press, New York, 1943. xiv + 403 pp. (Gray) 5-159.

Tables of Lagrangian Interpolation Coefficients. Prepared by the Federal Works Agency, Work Projects Administration; conducted under the sponsorship of the National Bureau of Standards. Technical Director: Arnold N. Lowan. Columbia University Press, New York, 1944. xxxvi + 392 pp. (Feller) 5-244.

Mathematical Tables Project. Table of $f_n(x) = n!/(x/2)^n J_n(x)$. J. Math. Phys. Mass. Inst. Tech. 23, 45-60 (1944). (Milne) 5-245.

Table of arc sin x. Prepared by the Mathematical Tables Project, conducted under the sponsorship of the National Bureau of Standards. Lyman J. Briggs, Director, National Bureau of Standards; Arnold N. Lowan, Director, Mathematical Tables Project. Columbia University Press, New York, 1945. xix + 124 pp. (Feller) 7-217.

Tables of Associated Legendre Functions. Prepared by the Mathematical Tables Project, conducted under the sponsorship of the National Bureau of Standards. Lyman J. Briggs, Director, National Bureau of Standards; Arnold N. Lowan, Director, Mathematical Tables Project. Columbia University Press, New York, 1945. xli + 303 pp. (Erdélyi) 7-217.

Tables of the Modified Hankel Functions of Order One-Third and of their Derivatives, by the Staff of the Computation Laboratory. The Annals of the Computation Laboratory of Harvard University, vol. II. Harvard University Press, Cambridge, Mass., 1945. xxxvi + 235 pp. (Erdélyi) 8-52.

Table of Characteristic Values of Mathieu's Differential Equation. AMP Report 165. 1R, Prepared by the Mathematical Tables Project, National Bureau of Standards, 1945. xxiv + 39 pp. (Miller) 12-207.

Tables of the probability integral of the mean deviation in normal samples. Biometrika 33, 259-265 (1945). (Mood) 8-42.

Numerical tables for the calculation of radiators. Comisión Impulsora y Coordinadora de la Investigación Científica. (Mexico). Anuario 1944, 125-247 (1945). (Spanish) (Comrie) 8-52.

Circular and Hyperbolic Functions. Exponential and Sine and Cosine Integrals. Factorial Function and Allied Functions. Hermitian Probability Functions. British Association for the Advancement of Science. Mathematical Tables, Volume 1. Prepared by the Committee for the Calculation of Mathematical Tables, Second Edition. Cambridge, at the University Press; New York, The Macmillan Company, 1946. xi + 72 pp. 7-337.

Tables of Fractional Powers. Prepared by the Mathematical Tables Project, conducted under the sponsorship of the National Bureau of Standards. Lyman J. Briggs, Director, National Bureau of Standards; Arnold N. Lowan, Director, Mathematical Tables Project. Columbia University Press, New York, 1946. xxx + 489 pp. (Boas) 8-52.

British Association for the Advancement of Science.

Mathematical Tables, Part-volume A. Legendre Polynomials. Prepared by the Committee for the Calculation of Mathematical Tables. Cambridge, at the University Press; New York, The Macmillan Company, 1946. 42 pp. (Bouwkamp) 8-353.

Mathematical Tables Project. Table of the Struve functions $L_\nu(x)$ and $H_\nu(x)$. J. Math. Phys. Mass. Inst. Tech. 25, 252-259 (1946). (Comrie) 8-354, 709.

More zeros of certain Bessel functions of fractional order. Math. Tables and Other Aids to Computation 2, 118-119 (1946). 8-53.

Tables of Spherical Bessel Functions. Prepared by the Mathematical Tables Project, National Bureau of Standards. Vol. I. Columbia University Press, New York, 1947. xxviii + 377 pp. (Erdélyi) 8-406.

Tables of the Bessel Functions of the First Kind of Orders Zero and One, by the Staff of the Computation Laboratory. The Annals of the Computation Laboratory of Harvard University, vol. III. Harvard University Press, Cambridge, Mass., 1947. xxxvii + 652 pp. (Erdélyi) 8-406.

Tables of the Bessel Functions of the First Kind of Orders Two and Three, by the Staff of the Computation Laboratory. The Annals of the Computation Laboratory of Harvard University, vol. IV. Harvard University Press, Cambridge, Mass., 1947. v + 652 pp. (Erdélyi) 8-406.

Tables of Supersonic Flow Around Cones, by the Staff of the Computing Section, Center of Analysis, Under the Direction of Zdeněk Kopál. Massachusetts Institute of Technology, Department of Electrical Engineering, Center of Analysis. Technical Report No. 1. Cambridge, Mass., 1947. xviii + 558 pp. (10 plates). (Sears) 8-540.

Tables of the Bessel Functions of the First Kind of Orders Four, Five, and Six, by the Staff of the Computation Laboratory. The Annals of the Computation Laboratory of Harvard University, vol. V. Harvard University Press, Cambridge, Mass., 1947. xiii + 650 pp. (Erdélyi) 8-605.

Tables of the Bessel Functions of the First Kind of Orders Seven, Eight, and Nine, by the Staff of the Computation Laboratory. The Annals of the Computation Laboratory of Harvard University, vol. VI. Harvard University Press, Cambridge, Mass., 1947. ix + 650 pp. (Erdélyi) 8-605.

Tables of Spherical Bessel Functions. Prepared by the Mathematical Tables Project, National Bureau of Standards. Vol. II. Columbia University Press, New York, 1947. xx + 328 pp. (Erdélyi) 9-103.

Table of the Bessel Functions $J_0(z)$ and $J_1(z)$ for Complex Arguments. Prepared by the Mathematical Tables Project, National Bureau of Standards. 2d ed. Columbia University Press, New York, 1947. xiv + 403 pp. 9-103.

Tables of Supersonic Flow Around Yawing Cones, by the Staff of the Computing Section, Center of Analysis, Under the Direction of Zdeněk Kopál. Massachusetts Institute of Technology, Department of Electrical Engineering, Center of Analysis. Technical Report No. 3. Cambridge, Mass., 1947. xviii + 323 pp. (2 plates). (Sears) 9-112.

Five-Figure Tables of Natural Trigonometrical Functions. Prepared by H. M. Nautical Almanac Office. London; His Majesty's Stationery Office; New York, British Information Services, 1947. iv + 124 pp. (Boas) 9-207, 735.

Tables of the Bessel Functions of the First Kind of Orders Ten, Eleven, and Twelve. By the Staff of the Computation Laboratory. Harvard University Press, Cambridge, Mass., 1947. 644 pp. (Erdélyi) 9-208.

Tables of the Bessel Functions of the First Kind of Orders Thirteen, Fourteen, and Fifteen. By the Staff of the Computation Laboratory. Harvard University Press, Cambridge, Mass., 1947. 624 pp. (Erdélyi) 9-208.

Tables of the Bessel Functions of the First Kind of Orders Sixteen Through Twenty-Seven. By the Staff of the Computation Laboratory. Harvard University Press, Cambridge, Mass., 1948. xi + 764 pp. (Erdélyi) 9-307.

Tables for the Design of Missiles. By the Staff of the Computation Laboratory. Harvard University Press, Cambridge, Mass., 1948. iv + 226 pp. (Miller) 9-469.

Tables of Bessel Functions of Fractional Order. Prepared by the Computation Laboratory of the National Applied Mathematics Laboratories, National Bureau of Standards. Volume I. Columbia University Press, New York, 1948. xlii + 413 pp. (Erdélyi) 9-533.

Tables of the Bessel Functions of the First Kind of Orders Twenty-Eight Through Thirty-Nine. By the Staff of the Computation Laboratory. Harvard University Press, Cambridge, Mass., 1948. ix + 694 pp. (Erdélyi) 10-150.

Tables of the Bessel Functions of the First Kind of Orders Forty Through Fifty-One, by the Staff of the Computation Laboratory. The Annals of the Computation Laboratory of Harvard University, vol. XI. Harvard University Press, Cambridge, Mass., 1948. xi + 620 pp. (Erdélyi) 10-483.

Tables of the Bessel functions $Y_0(x)$, $Y_1(x)$, $K_0(x)$, $K_1(x)$ $0 \leq x \leq 1$. National Bureau of Standards. Appl. Math. Ser., no. 1, x + 60 pp. (1948). (Miller) 10-150.

Tables of Bessel Functions of Fractional Order. Prepared by the Computation Laboratory of the National Applied Mathematics Laboratories, National Bureau of Standards. Volume II. Columbia University Press, New York, N. Y., 1949. xviii + 365 pp. (Erdélyi) 10-483.

Tables of Generalized Sine- and Cosine-Integral Functions. Part I. By the Staff of the Computation Laboratory. Harvard University Press, Cambridge, Mass., 1949. xxxviii + 462 pp. (Miller) 10-572.

Tables of Generalized Sine- and Cosine-Integral Functions. Part II. By the Staff of the Computation Laboratory. Harvard University Press, Cambridge, Mass., 1949. viii + 560 pp. (Miller) 10-572.

Tables of Inverse Hyperbolic Functions. By the Staff of the Computation Laboratory. Harvard University Press, Cambridge, Mass., 1949. xx + 290 pp. (Miller) 10-573.

Tables of the confluent hypergeometric function $F(n/2, 1/2; x)$ and related functions. National Bureau of Standards. Appl. Math. Ser., no. 3, xdi + 73 pp. (1949). (Miller) 10-740.

Tables of Scattering Functions for Spherical Particles. National Bureau of Standards. Appl. Math. Ser., no. 4, xiii + 119 pp. (1949). (Bouwkamp) 10-625.

Table of sines and cosines to fifteen decimal places at hundredths of a degree. National Bureau of Standards. Appl. Math. Ser., no. 5, viii + 95 pp. (1949). (Miller) 10-740.

Tables of Supersonic Flow Around Cones of Large Yaw, by the Staff of the Computing Section, Center of Analysis, Under the Direction of Zdeněk Kopal. Massachusetts Institute of Technology, Department of Electrical Engineering, Center of Analysis. Technical Report No. 5. Cambridge, Mass., 1949. xviii + 125 pp. (1 plate) (Sears) 11-65.

Tables of the Bessel Functions of the First Kind of Orders Fifty-Two Through Sixty-Three. By the Staff of the Computation Laboratory. Harvard University Press, Cambridge, Mass., 1949. ix + 544 pp. (Erdélyi) 11-135.

Tables of Circular and Hyperbolic Sines and Cosines for Radian Arguments. Prepared by U.S. Department of Commerce, National Bureau of Standards, The Computation Laboratory. Mathematical Table MT3, 2d ed. United States Government Printing Office, Washington, D. C., 1949. xviii + 405 pp. 11-263.

Tables of the Bessel Functions of the First Kind of Orders Sixty-Four Through Seventy-Eight, by the Staff of the Computation Laboratory. The Annals of the Computation Laboratory of Harvard University, vol. XIII. Harvard University Press, Cambridge, Mass., 1949. x + 566 pp. (Erdélyi) 11-463.

Tables of the Generalized Exponential-Integral Functions, by the Staff of the Computation Laboratory. The Annals of the Computation Laboratory of Harvard University, vol. XXI.

Harvard University Press, Cambridge, Mass., 1949. xxvi + 416 pp. (Miller) 11-691.

Tables of the Function $\sin x/x$ and of its First Eleven Derivatives, by the Staff of the Computation Laboratory. The Annals of the Computation Laboratory of Harvard University, vol. XXII. Harvard University Press, Cambridge, Mass., 1949. xviii + 241 pp. (Miller) 11-692.

Tables of Spherical Wave Functions. Numerical Computation Bureau, Tokyo. Rep. no. 3, iv + 77 pp. (1950). (Archibald) 12-132.

Table of the Bessel Functions $Y_0(z)$ and $Y_1(z)$ for Complex Arguments. Prepared by the Computation Laboratory, National Bureau of Standards. Columbia University Press, New York, N. Y., 1950. xl + 427 pp. (Erdélyi) 12-285.

Tables for Conversion of X-ray Diffraction Angles to Interplanar Spacing. National Bureau of Standards, Applied Mathematics Series, No. 10. United States Government Printing Office, Washington, D. C., 1950. v + 159 pp. 12-360.

Tables d'intérêts et d'annuités éditées par la Crédit Communal de Belgique. Intrest en annuïteits tafels uitgegeven door het Gemeentekrediet van België. Brussels, 1950. 163 pp. (Bennett) 12-536.

Tablitsy značenií funkcií Besselya ot mnimogo argumenta. [Tables of the Values of Bessel Functions of an Imaginary Argument]. Edited by I. M. Vinogradov and N. G. Četaev. Izdat. Akad. Nauk SSSR, Moscow-Leningrad, 1950. xii + 403 pp. (Archibald) 12-537.

Tables Relating to Mathieu Functions. Characteristic Values, Coefficients, and Joining Factors. Prepared by The Computation Laboratory of the National Applied Mathematics Laboratories, National Bureau of Standards. Columbia University Press, New York, N. Y., 1951. xlviii + 278 pp. (Strutt) 12-859.

Tables of the Bessel Functions of the First Kind of Orders Seventy-Nine Through One Hundred Thirty-Five, by the Staff of the Computation Laboratory. The Annals of the Computation Laboratory of Harvard University, vol. XIV. Harvard University Press, Cambridge, Mass., 1951. x + 614 pp. (Erdélyi) 13-76.

Tables to Facilitate Sequential t-Tests. National Bureau of Standards Appl. Math. Ser., no. 7. U.S. Government Printing Office, Washington, D. C., 1951. xix + 82 pp. (Chernoff) 13-141.

Tables of the Exponential Function e^x . 3d ed. National Bureau of Standards Applied Mathematics Series, No. 14. U.S. Government Printing Office, Washington, D. C., 1951. xi + 540 pp. 13-386.

Circular and hyperbolic functions. Exponential and sine and cosine integrals. Factorial function and allied functions. Hermitian probability functions. British Association for the Advancement of Science, Mathematical Tables, vol. I. Prepared by the Committee for the Calculation of Mathematical Tables. 3d ed. Cambridge, at the University Press, 1951. xl + 72 pp. 13-689.

Tables of the error function and of its first twenty derivatives. By the Staff of the Computation Laboratory. The Annals of the Computation Laboratory of Harvard University, vol. 23. Harvard University Press, Cambridge, Mass., 1952. xxviii + 276 pp. (Wehausen) 13-494.

Tables of Coulomb wave functions. Vol. I. National Bureau of Standards Applied Mathematics Series, No. 17. U.S. Government Printing Office, Washington, D. C., 1952. xxvii + 141 pp. (Erdélyi) 13-988.

Tables of the Bessel functions $Y_0(x)$, $Y_1(x)$, $K_0(x)$, $K_1(x)$, $0 \leq x \leq 1$. National Bureau of Standards Applied Mathematics Series, No. 25. U.S. Government Printing Office, Washington, D. C., 1952. x + 60 pp. 14-321.

Tables for the analysis of beta spectra. National Bureau of Standards Applied Mathematics Series, no. 13. U.S. Government Printing Office, Washington, D. C., 1952. iii + 61 pp. (Erdélyi) 14-411.

A selection of tables for use in calculations of compressible airflow. Prepared on behalf of the Aeronautical Research Council by the Compressible Flow Tables Panel. Oxford, at the Clarendon Press, 1952. viii + 143 pp. (Kuo) 14-510.

Desyatziznačnye tablicy logarifmov kompleksnyh čisel i perehoda ot dekartovyh koordinat k polynarym. Tablicy funkcij $\ln x$, $\arctg x$, $(1/2)\ln(1+x^2)$, $\sqrt{1+x^2}$. [Ten-place tables of logarithms of complex numbers and of the transformation from cartesian to polar coordinates. Tables of the functions $\ln x$, $\arctg x$, $(1/2)\ln(1+x^2)$, $\sqrt{1+x^2}$.] Izdat. Akad. Nauk SSSR, Moscow, 1952. 116 pp. (1 plate). 14-587.

Tables des fonctions de Legendre associées. Fonction associées de première espèce $P_n^m(\cos \theta)$. Premier fascicule: $[n: -0, 5 (0, 1) 10]$, $[m: 0 (1) 5]$, $[\theta: 0 (1) 90^\circ]$. Éditions de La Revue d'Optique, Paris, 1952. xxi + 292 pp. (Erdélyi) 15-162.

Tables of Chebyshev polynomials $S_n(x)$ and $C_n(x)$. National Bureau of Standards Applied Mathematics Series, No. 9. U.S. Government Printing Office, Washington, D.C., 1952. xxx + 161 pp. (L. Fox) 16-959.

Auxiliary table for Wilcoxon's two sample test. Mathematical Centre, Amsterdam, Rep. R132/S86, 35 pp. (1952). (Bennett) 14-189.

Table of Arctan x . National Bureau of Standards Applied Mathematics Series, No. 26, U.S. Government Printing Office, Washington 25, D.C., 1953. xiii + 170 pp. 14-905.

Tables of Bessel-Clifford functions of orders zero and one. National Bureau of Standards Applied Mathematics Series, no. 28. U.S. Government Printing Office, Washington, D.C. x + 72 pp. (J. C. P. Miller) 14-905.

Tables of normal probability functions $1/\sqrt{2\pi}e^{-x^2/2}$ and $1/\sqrt{2\pi}\int_{-x}^x e^{-\alpha^2/2}d\alpha$. National Bureau of Standards Applied Mathematics Series No. 23. U.S. Government Printing Office, Washington, D.C., 1953. ix + 344 pp. 14-1125.

Kartografičeskie tablicy. [Cartographic tables.] 2d ed. Trudy Central'nogo Naučno-Issledovatel'skogo Instituta Geodezii, Aëros'emki i Kartografii, vyp. 97. Izdat. Geodez. i Kartograf. Lit., Moscow, 1953. 137 pp. 15-255.

Table of natural logarithms for arguments between zero and five to sixteen decimal places. National Bureau of Standards Applied Mathematics Series, No. 31. U.S. Government Printing Office, Washington, D.C., 1953. x + 501 pp. 15-255.

Tables of circular and hyperbolic sines and cosines for radian arguments. National Bureau of Standards Applied Mathematics Series, No. 36. U.S. Government Printing Office, Washington, D.C., 1953. x + 407 pp. 15-352.

Tables of 10^x (antilogarithms to the base 10). National Bureau of Standards Applied Mathematics Series No. 27. U.S. Government Printing Office, Washington, D.C., 1953. viii + 543 pp. (Miller) 15-557.

Probability tables for the analysis of extreme-value data. National Bureau of Standards Applied Mathematics Series No. 22. U.S. Government Printing Office, Washington, D.C., 1953. iii + 32 pp. (H. O. Hartley) 15-884.

Tablicy integralov Frenelya. [Tables of Fresnel integrals.] Izdat. Akad. Nauk SSSR, Moscow, 1953. 269 pp. (2 inserts) (Lehmer) 16-523.

Struve function of order three-halves. J. Research Nat. Bur. Standards 50, 21-29 (1953). (Miller) 14-905.

Tables of complete downwash due to a rectangular vortex. Computed by the staff of the Mathematics Division, N. P. L. Preface by V. M. Falkner. Ministry of Supply [London], Aeronaut. Res. Council, Rep. and Memoranda no. 2461, 18 pp. (1953). (Reissner) 14-905.

Tables of Lagrangian coefficients for sexagesimal interpolation. National Bureau of Standards Applied Mathematics Series No. 35. U.S. Government Printing Office, Washington, D.C., 1954. ix + 157 pp. (J. C. P. Miller) 15-829.

Table of secants and cosecants to nine significant figures

at hundredths of a degree. National Bureau of Standards Applied Mathematics Series No. 40. U.S. Government Printing Office, Washington, D.C., 1954. vi + 46 pp. (Miller) 15-829.

Table of sine and cosine integrals for arguments from 10 to 100. National Bureau of Standards Applied Mathematics Series, No. 32. U.S. Government Printing Office, Washington, D.C., 1954. xv + 187 pp. 16-174.

Tables of Whittaker functions. Numerical Computation Bureau, Tokyo, Rep. No. 8. The Tsuneta Yano Memorial Society, Tokyo, 1954. 39 pp. (Erdélyi) 16-175.

Table of binomial coefficients. Under the editorship of J. C. P. Miller. Royal Society Mathematical Tables, Vol. 3. Cambridge, at the University Press, 1954. viii + 162 pp. (Lehmer) 16-286.

Tables of the error function and its derivative

$$H(x) = 2/\sqrt{\pi} \int_0^x e^{-\alpha^2} d\alpha \text{ and } H'(x) = 2/\sqrt{\pi} e^{-x^2}.$$

National Bureau of Standards Applied Mathematics Series No. 41. U.S. Government Printing Office, Washington, D.C., 1954. xi + 302 pp. 16-287.

Tables of functions and of zeros of functions. Collected short tables of the National Bureau of Standards Computation Laboratory. National Bureau of Standards Applied Mathematics Series, no. 37. U.S. Government Printing Office, Washington, D.C., 1954. ix + 211 pp. 16-402.

Table of the gamma function for complex arguments.

National Bureau of Standards Applied Mathematics Series, No. 34. U.S. Government Printing Office, Washington, D.C., 1954. xvi + 105 pp. (Miller) 16-403.

Table of salvo kill probabilities for square targets. National Bureau of Standards Applied Mathematics Series, no. 44. U.S. Government Printing Office, Washington, D.C., 1954. ix + 33 pp. 16-403.

Tablicy integral'nogo sinusa i kosinusa. [Tables of the sine and cosine integral.] Izdat. Akad. Nauk SSSR, Moscow, 1954. 473 pp. (2 inserts) (Lehmer) 16-523.

Tables of sines and cosines for radian arguments. National Bureau of Standards Applied Mathematics Series, no. 43. U.S. Government Printing Office, Washington, D.C., 1955. xiii + 278 pp. 16-628.

Tablicy e^x i e^{-x} . [Tables of e^x and e^{-x} .] Izdat. Akad. Nauk SSSR, Moscow, 1955. 145 pp. (John Todd) 16-1152.

Table of hyperbolic sines and cosines, $x = 2$ to $x = 10$. National Bureau of Standards Applied Mathematics Series, no. 45. U.S. Government Printing Office, Washington, D.C., 1955. v + 81 pp. (L. Fox) 17-541.

Table of the descending exponential, $x = 2.5$ to $x = 10$. National Bureau of Standards Applied Mathematics Series, no. 46. U.S. Government Printing Office, Washington, D.C., 1955. v + 76 pp. (L. Fox) 17-541.

Tables of the cumulative binomial probability distribution. By the Staff of the Computation Laboratory. The Annals of the Computation Laboratory of Harvard University, vol. 35. Harvard University Press, Cambridge, Mass., 1955. lxi + 503 pp. (D. H. Lehmer) 18-517.

The normal probability function: tables of certain area-ordinate ratios and of their reciprocals. Biometrika 42, 217-222 (1955). (A. Blake) 17-92.

Tables of the function arc sin z . By the Staff of the Computation Laboratory. The Annals of the Computation Laboratory of Harvard University, vol. 40. Harvard University Press, Cambridge, Mass., 1956. xxxviii + 586 pp. (John Todd) 17-1011.

Table of square roots of complex numbers. Report No. 10 of Numerical Computation Bureau, Tokyo, 1956. 21 pp. (D. H. Lehmer) 18-420.

Tables of Whittaker functions (wave functions in Coulomb field). Report No. 9 of Numerical Computation Bureau. The Tsuneta Yano Memorial Society, Tokyo, 1956. 67 pp. (D. H. Lehmer) 18-421.

- Table of natural logarithms for arguments between five and ten to sixteen decimal places. National Bureau of Standards. Applied Mathematics Series, No. 53. On processes of "happenings" generated by a Poisson process. *Magyar Tud. Akad. Mat. Fiz. Oszt. Közl.* 4, 525-541 (1954). (Hungarian) (Lukacs) 16-723.

"Waiting-time" problems treated by means of Markov processes. *Magyar Tud. Akad. Mat. Fiz. Oszt. Közl.* 4, 543-570 (1954). (Hungarian) (Lukacs) 16-723.

On stochastic processes connected with certain physical registration mechanisms. *Magyar Tud. Akad. Mat. Fiz. Oszt. Közl.* 4, 571-587 (1954). (Hungarian) (Lukacs) 16-723.

On processes of happenings generated by means of a Poisson process. *Acta Math. Acad. Sci. Hungar.* 6, 81-99 (1955). (Russian summary) 17-51.

Investigation of waiting time problems by reduction to Markov processes. *Acta Math. Acad. Sci. Hungar.* 6, 101-129 (1955). (Russian summary) 17-51.

On stochastic processes connected with certain physical recording apparatuses. *Acta Math. Acad. Sci. Hungar.* 6 (1955), 363-380. (Russian summary) 17-867.

Some investigations concerning recurrent stochastic processes of a certain type. *Magyar Tud. Akad. Alkalm. Mat. Int. Közl.* 3 (1954), 115-128 (1955). (Hungarian, Russian and English summaries) (E. Lukacs) 17-866.

Anwendung wahrscheinlichkeitstheoretischer Methoden bei der Untersuchung gewisser meteoropathologischer Erscheinungen. *Magyar Tud. Akad. Alkalm. Mat. Int. Közl.* 3 (1954), 301-320 (1955). (Hungarian, Russian and German summaries) (E. Lukacs) 17-870.

On secondary stochastic processes derived by means of recurrence processes. *Magyar Tud. Akad. Mat. Fiz. Oszt. Közl.* 5, 187-197 (1955). (Hungarian) (E. Lukacs) 17-276.

On a general theorem of probability theory. *Magyar Tud. Akad. Mat. Fiz. Oszt. Közl.* 5 (1955), 467-476. (Hungarian) (E. Lukacs) 17-499.

Remark to a paper of P. Turán entitled "On a problem in the history of Chinese mathematics." *Mat. Lapok* 6 (1955), 27-29. (Hungarian, Russian and English summaries) 17-459.

On secondary stochastic processes generated by recurrent processes. *Acta Math. Acad. Sci. Hungar.* 7 (1956), 17-29. (Russian summary) (E. Lukacs) 17-1217.

On the generalization of Erlang's formula. *Acta Math. Acad. Sci. Hungar.* 7 (1956), 419-433. (Russian summary) (A. Jensen) 19-623.

On a probability treatment of electron-tube plate-current oscillation. *Magyar Tud. Akad. Mat. Fiz. Tud. Oszt. Közl.* 6 (1956), 27-51. (Hungarian) (E. Lukacs) 17-1218.

A probability method for the treatment of the secondary electron emission. *Magyar Tud. Akad. Mat. Fiz. Oszt. Közl.* 6 (1956), 199-211. (Hungarian) (Zoltan Bay) 20 #6740.

On stochastic processes which occur in the theory of particle counters. *Magyar Tud. Akad. Mat. Fiz. Oszt. Közl.* 6 (1956), 369-421. (Hungarian) (E. Lukacs) 20 #1368.

On a probability problem arising in the theory of counters. *Proc. Cambridge Philos. Soc.* 52 (1956), 488-498. (E. Lukacs) 18-424.

On the sequence of events, selected by a counter from a

recurrent process of events. *Teor. Veroyatnost, i Primenen.* 1 (1956), 90-102. (Russian summary) (H. B. Mann) 18-831.

On some probability problems concerning the theory of counters. *Acta Math. Acad. Sci. Hungar.* 8 (1957), 127-138. (H. B. Mann) 19-777.

On certain sojourn time problems in the theory of stochastic processes. *Acta Math. Acad. Sci. Hungar.* 8 (1957), 169-191. (E. Lukacs) 19-467.

On limiting distributions concerning a sojourn time problem. *Acta Math. Acad. Sci. Hungar.* 8 (1957), 279-294. (E. Lukacs) 20 #2799.

On a probability problem concerning telephone traffic. *Acta Math. Acad. Sci. Hungar.* 8 (1957), 319-324. (R. G. Laha) 20 #2801.

On a queueing problem concerning telephone traffic. *Acta Math. Acad. Sci. Hungar.* 8 (1957), 325-335. (R. G. Laha) 20 #2802.

Über die wahrscheinlichkeitstheoretische Behandlung der Anodenstromschwankungen von Elektronenröhren. *Acta. Phys. Acad. Sci. Hungar.* 7 (1957), 25-50. (Russian summary) 19-710.

On a certain waiting time problem. *Magyar Tud. Akad. Mat. Fiz. Oszt. Közl.* 7 (1957), 183-197. (Hungarian) (E. Lukacs) 20 #1369.

Sojourn time problems. *Magyar Tud. Akad. Mat. Fiz. Oszt. Közl.* 7 (1957), 371-395. (Hungarian) (E. Lukacs) 20 #2800.

On secondary stochastic processes generated by a multi-dimensional Poisson process. *Magyar Tud. Akad. Mat. Kutató Int. Közl.* 2 (1957), 71-80. (Hungarian and Russian summaries) (M. Rosenblatt) 20 #7356.

On random walk problems. *Magyar Tud. Akad. Mat. Kutató Int. Közl.* 2 (1957), 81-90. (Hungarian, Russian and English summaries) (Zoltan Bay) 20 #5529.

On a stochastic process concerning some waiting time problems. *Teor. Veroyatnost, i Primenen.* 2 (1957), 92-105. (Russian summary) (E. Lukacs) 19-692.

On a coincidence problem concerning telephone traffic. *Acta Math. Acad. Sci. Hungar.* 9 (1958), 45-81. (E. Lukacs) 20 #2804.

On a probability problem in theory of counters. *Ann. Math. Statist.* 29 (1958), 1257-1263. (J. Riordan) 20 #6155.

Some probability questions in the theory of telephone traffic. *Magyar Tud. Akad. Mat. Fiz. Oszt. Közl.* 8 (1958), 151-210. (Hungarian) (E. Lukacs) 20 #2803.

Takagi, Mitiyasu.

On a statistical domain theory of ferromagnetic crystals. Part I. Magnetization and magnetostriiction. Part II. Mutual action of magnetism and mechanical force. *Sci. Rep. Tôhoku Imp. Univ., Ser. 1.* 28, 20-127 (1939). (T. Neugebauer) 1-277.

Differentialgeometrien in den Kugelräumen. Bd. II.
Laguerresche Differentialkugelgeometrie. Maruzen Company,
Ltd., Tokyo, 1939. xx + 444 pp. (A. Kawaguchi) 1-86.

Neue Verallgemeinerungen der L-Minimalflächen. Monatsh.
Math. Phys. 48, 170-175 (1939). (Haantjes) 1-173.

Laguerre-geometrische Verallgemeinerung eines Satzes von
Carleman über die Isoperimetrie auf den Minimalflächen im
weitem Sinne. Abh. Preuss. Akad. Wiss. Math.-Nat. Kl.
1939, no. 23, 14 pp. (1940). (Radó) 2-304.

Gemeinsame Behandlungsweise der elliptischen konformen,
hyperbolischen konformen und parabolischen konformen
Differentialgeometrien. Proc. Imp. Acad. Tokyo 16, 333-340
(1940). (Michal) 2-166.

Gemeinsame Behandlungsweise der elliptischen Lieschen,
hyperbolischen Lieschen und parabolischen Lieschen Differen-
tialgeometrien. Proc. Imp. Acad. Tokyo 16, 341-345 (1940).
(Michal) 2-166.

Gemeinsame Behandlungsweise der elliptischen Laguerre-
schen, hyperbolischen Laguerreschen und parabolischen
Laguerreschen Differentialgeometrien. Proc. Imp. Acad.
Tokyo 16, 346-349 (1940). (Michal) 2-166.

Zur Theorie der Minimalkurven im konformen Raume.
Tôhoku Math. J. 47, 129-158 (1940). (Vanderslice) 2-304.

Gemeinsame Behandlung der Differential- und Integral-
invarianten der Kurven und der "Horn Angles" in den ellipti-
schen konformen, parabolischen konformen und hyperbolischen
konformen Ebenen. Proc. Imp. Acad. Tokyo 17, 163-169
(1941). (Michal) 3-192.

Gemeinsame Behandlung der Äquivalenzprobleme der Kurven
in der elliptischen konformen, parabolischen konformen und
hyperbolischen konformen Ebene. Proc. Imp. Acad. Tokyo
17, 170-174 (1941). (Michal) 3-192.

Gemeinsame Behandlung der Äquivalenzprobleme der
Kurven in der elliptischen Laguerreschen, parabolischen
Laguerreschen und hyperbolischen Laguerreschen Ebene.
Proc. Imp. Acad. Tokyo 17, 175-177 (1941). (Michal) 3-192.

Gemeinsame Behandlungsweise der elliptischen konformen,
hyperbolischen konformen und parabolischen konformen
Differentialgeometrien. II. Proc. Imp. Acad. Tokyo 17,
330-338 (1941). (DeCicco) 7-264.

Gemeinsame Behandlungsweise der elliptischen Laguerre-
schen, hyperbolischen Laguerreschen und parabolischen
Laguerreschen Differentialgeometrien. II. Proc. Imp. Acad.
Tokyo 17, 339-343 (1941). (DeCicco) 7-264.

Gemeinsame Behandlungsweise der elliptischen Lieschen,
hyperbolischen Lieschen und parabolischen Lieschen Differen-
tialgeometrien. II. Proc. Imp. Acad. Tokyo 17, 344-348
(1941). (DeCicco) 7-264.

Einheitliche Theorie der Funktionen einer binären komplexen
Veränderlichen. Proc. Imp. Acad. Tokyo 17, 349-357 (1941).
(Beckenbach) 7-291.

Einheitliche Theorie der Funktionen einer binären komplexen
Veränderlichen. II. Proc. Imp. Acad. Tokyo 17, 466-473
(1941). (Beckenbach) 7-291.

Realisierung jeder von den elliptischen konformen, para-
bolischen konformen, hyperbolischen konformen, elliptischen
Laguerreschen, parabolischen Laguerreschen und hyperboli-
schen Laguerreschen Räumen in einem andern. Tôhoku Math.
J. 48, 331-343 (1941). (DeCicco) 10-482.

Allgemeine Bahn der Theorie der Funktionen einer
allgemeinen binären komplexen veränderlichen. Proc. Phys.-
Math. Soc. Japan (3) 25, 209-220 (1943). (DeCicco) 7-291.

Theorie der Funktionen einer allgemeinen bikomplexen
Veränderlichen. I. Sci. Rep. Tôhoku Imp. Univ., Ser. 1.
32, 1-55 (1945). (DeCicco) 10-445.

Differentialgeometrien in den Kugelräumen. Band II.
Laguerresche Differentialkugelgeometrie. 2d printing.

Connection spaces in the large. I. Non-holonomic spaces with general linear connections. *Yokohama Math. J.* 1, 1-28 (1953). (Schouten) 15-350.

Connection spaces in the large. II. Non-holonomic affine geometry. *Yokohama Math. J.* 1, 29-38 (1953). (Schouten) 15-350.

Connection spaces in the large. III. Non-holonomic Euclidean geometry. *Yokohama Math. J.* 1, 39-74 (1953). (Schouten) 15-350.

Connection spaces in the large. IV. Non-holonomic Laguerre geometry. *Yokohama Math. J.* 1, 75-77 (1953). (Schouten) 15-350.

Connection spaces in the large. V. Non-holonomic conformal geometry. *Yokohama Math. J.* 1, 79-82 (1953). (Schouten) 15-350.

Connection spaces in the large. VI. Non-holonomic Lie geometry and non-holonomic parabolic Lie geometry. *Yokohama Math. J.* 1, 83-87 (1953). (Schouten) 15-350.

The general relativity as a three-dimensional non-holonomic Laguerre geometry of the second kind, its gravitation theory and its quantum mechanics. *Yokohama Math. J.* 1, 89-104 (1953). (Schouten) 15-358.

A combined field theory as a three-dimensional non-holonomic parabolic Lie geometry and its quantum mechanics. *Yokohama Math. J.* 1, 105-116 (1953). (Schouten) 15-381.

A complex function theory on a "supra-corpus" of n -dimensional hypercomplex numbers. I. *Yokohama Math. J.* 1, 131-224 (1953). (Ketchum) 16-350.

A necessary unitary field theory as a non-holonomic parabolic Lie geometry realized in the three-dimensional Cartesian space and its quantum mechanics. *Yokohama Math. J.* 1, 263-273 (1953). (Schouten) 16-184.

A necessary unitary field theory as a non-holonomic parabolic Lie geometry realized in the three-dimensional Cartesian space. II. *Proc. Japan Acad.* 30, 702-708 (1954). (Haantjes) 16-1058.

Equations of motion of a free particle in the author's general relativity as a non-holonomic Laguerre geometry realized in the moving three-dimensional Cartesian space. *Proc. Japan Acad.* 30, 814-819 (1954). (J. Haantjes) 16-1165.

A complex function theory on a "supra-corpus" of n -dimensional hypercomplex numbers. II. A theory of triply periodic functions. *Yokohama Math. J.* 2, 1-68 (1954). (J. A. Ward) 17-28.

Connection spaces in the large. X. A new view on the relation between the "Erlanger Programm" and the linear connections. *Yokohama Math. J.* 2, 81-94 (1954). (J. A. Schouten) 16-1053.

Non-conjectural theory of relativity as a non-holonomic Laguerre geometry realized in the three-dimensional torsioned Cartesian space fibered with actions. *Proc. Japan Acad.* 31 (1955), 606-609. (J. A. Schouten) 17-676.

A complex function theory with generalized Dirac matrices as complex units. I. *Yokohama Math. J.* 2 (1954), 107-126 (1955). (J. A. Ward) 17-1193.

Unified 'Schnitt'-like real representations of the three kinds of general binary complex numbers. *Yokohama Math. J.* 2 (1954), 127-136 (1955). (J. A. Ward) 17-1180.

A unified theory of the three kinds of the general binary complex elements in the purely synthetic projective geometry. *Yokohama Math. J.* 2 (1954), 137-144 (1955). (J. A. Ward) 17-1180.

Non-conjectural theory of relativity as a non-holonomic Laguerre geometry realized in the three-dimensional teleparallelismically torsioned Cartesian space fibered with non-holonomic actions. *Yokohama Math. J.* 3 (1955), 1-52. (J. A. Schouten) 18-363.

A fact, which is unfavorable to the theory of general relativity of A. Einstein. *Proc. Japan Acad.* 32 (1956), 535-538. (J. A. Schouten) 19-226.

Non-holonomic Laguerre fibre bundle geometry. *Yokohama Math. J.* 4 (1956), 1-46. (F. Hirzebruch and P. Dombrowski) 19-61.

Some classes of function-theoretical solutions of the Laplacian and the wave equation. *Yokohama Math. J.* 4 (1956), 65-79. (J. A. Ward) 20 #1756.

Die endgültige kugelgeometrische Relativitätstheorie, welche als eine Faserbündelgeometrie aufgefasst ist. *Yokohama Math. J.* 4 (1956), 119-146. (H. Rund) 20 #739.

Non-connection methods for the theory of principal fibre bundles as almost Kleinean geometries. *Proc. Japan Acad.* 33 (1957), 515-520. (A. Nijenhuis) 20 #2761.

Generalized Riemannian geometry. I. *Yokohama Math. J.* 5 (1957), 115-169. (H. Rund) 20 #6136.

Erweiterung des Erlanger Programms durch Transformationsgruppenweiterungen. *Proc. Japan Acad.* 34 (1958), 471-476. (H. Rund) 20 #7290.

Global differential geometries of principal fibre bundles in the forms of almost Kleinean geometries by non-connection methods. I. *Yokohama Math. J.* 6 (1958), 1-77. 20 #6722.

Simplification of a differential equation due to G. Darboux. *Univ. Nac. Tucumán. Revista A.* 5, 105-112 (1946). (Haimovici) 8-603.

On curved shock waves. *J. Math. Phys. Mass. Inst. Tech.* 26, 62-68 (1947). (Ling) 8-611.

Characteristic coordinates for hyperbolic differential equations in the large. *Proc. Nat. Acad. Sci. U.S.A.* 33, 242-246 (1947). (John) 9-64.

On the stability and instability of shock waves. *Proc. Nat. Acad. Sci. U.S.A.* 34, 526-530 (1948). (Ling) 10-271.

Calculation of the curvatures of attached shock waves. *J. Math. Physics* 27, 279-297 (1949). (Ling) 10-494.

The consistency relations for shock waves. *J. Math. Physics* 28, 62-90 (1949). (Ling) 10-758.

On conditions for steady plane flow with shock waves. *J. Math. Physics* 28, 91-98 (1949). (Ling) 10-758; 11-278.

The distribution of singular shock directions. *J. Math. Physics* 28, 153-172 (1949). (Ling) 11-479.

The fundamental hydrodynamical equations and shock conditions for gases. *Math. Mag.* 22, 169-189 (1949). (Ling) 11-278.

First approximation of pressure distribution on curved profiles at supersonic speeds. *Proc. Nat. Acad. Sci. U.S.A.* 35, 619-627 (1949). (Ling) 11-554.

The determination of pressure on curved bodies behind shocks. *Comm. Pure Appl. Math.* 3, 103-132 (1950). (Ling) 12-369.

Distribution of pressure on curved profiles in supersonic gas flow with variable entropy. *Proc. Nat. Acad. Sci. U.S.A.* 36, 109-115 (1950). (Ling) 11-752.

A theory of the stability of shock waves. *Proceedings of the Midwestern Conference on Fluid Dynamics*, 1950, pp. 109-120. J. W. Edwards, Ann Arbor, Michigan, 1951. (Lin) 14-699.

The separation of supersonic flow from curved profiles. *Indiana Univ. Publ. Sci. Ser.* no. 17, 69 pp. (1951). (Pack) 14-921.

On the characteristic surfaces of the von Mises plasticity equations. *J. Rational Mech. Anal.* 1, 343-357 (1952). (Coburn) 14-113.

Singular surfaces and flow lines in the theory of plasticity. *J. Rational Mech. Anal.* 2, 339-381 (1953). (Prager) 14-820.

On the inclination of plastic slip bands in flat bars in tension tests. *Proc. Nat. Acad. Sci. U.S.A.* 39, 257-265 (1953). (Prager) 14-1040.

The effect of compressibility on the inclination of plastic slip bands in flat bars. *Proc. Nat. Acad. Sci. U.S.A.* 39, 266-273 (1953). (Prager) 14-1041.

Sonic point on supersonic airfoils. *Proc. Nat. Acad. Sci. U.S.A.* 40, 76-83 (1954). (Pack) 15-1001.

Determination of the plastic yield condition as a variational problem. *Proc. Nat. Acad. Sci. U.S.A.* 40, 322-331 (1954). (Prager) 15-759.

On the rotation of grid lines produced by the formation of plastic bands in tension tests. *Proc. Nat. Acad. Sci. U.S.A.* 40, 401-407 (1954). (Hopkins) 16-311.

Grid rotation in Lüders bands. *Proc. Nat. Acad. Sci. U.S.A.* 40, 565-572 (1954). (Hopkins) 16-311.

A discussion of the load drop and related matters associated with the formation of a Lüders band. *Proc. Nat. Acad. Sci. U.S.A.* 40, 572-576 (1954). (Hopkins) 16-311.

Interdependence of the yield condition and the stress-strain relations for plastic flow. *Proc. Nat. Acad. Sci. U.S.A.* 40, 593-597 (1954). (Prager) 16-94.

A remark on detached shocks. *Proc. Nat. Acad. Sci. U.S.A.* 40, 1002-1004 (1954). (Giese) 16-418.

On the structure of the stress-strain relations. *Proc. Nat. Acad. Sci. U.S.A.* 41 (1955), 716-720. (A. E. Green) 17-321.

Combined elastic and Prandtl-Reuss stress-strain relations. *Proc. Nat. Acad. Sci. U.S.A.* 41 (1955), 720-726. (A. E. Green) 17-321.

Kinematically preferred co-ordinate systems. *Proc. Nat. Acad. Sci. U.S.A.* 41 (1955), 762-770. (N. Coburn) 17-297.

Combined elastic and von Mises stress-strain relations. *Proc. Nat. Acad. Sci. U.S.A.* 41 (1955), 908-910. (A. E. Green) 17-321.

Characteristic surfaces in the Prandtl-Reuss plasticity theory. *J. Rational Mech. Anal.* 5 (1956), 251-262. (J. L. Ericksen) 17-1153.

Slip surfaces in plastic solids. *Proc. Nat. Acad. Sci. U.S.A.* 42 (1956), 923-927. (J. L. Ericksen) 18-616.

On the propagation of weak discontinuities in perfectly plastic solids. *J. Math. Mech.* 6 (1957), 67-85. (J. L. Ericksen) 18-690.

Extended compatibility conditions for the study of surfaces of discontinuity in continuum mechanics. *J. Math. Mech.* 6 (1957), 311-322. (W. Prager) 19-192.

The growth and decay of sonic discontinuities in ideal gases. *J. Math. Mech.* 6 (1957), 455-469. (J. H. Giese) 19-1224.

On the propagation and decay of spherical blast waves. *J. Math. Mech.* 6 (1957), 607-619. (J. H. Giese) 19-1224.

The decay of waves in elastic solids. *J. Math. Mech.* 6 (1957), 759-768. (I. N. Sneddon) 19-1214.

Deformation energy and the stress-strain relations for isotropic materials. *J. Math. Phys.* 35 (1957), 335-350. (J. L. Ericksen) 18-962.

The Lüders band problem. *J. Math. Mech.* 7 (1958), 17-27. (R. Hill) 19-1114.

On the velocity of formation of Lüders bands. *J. Math. Mech.* 7 (1958), 141-148. (R. Hill) 20 #2133.

Plastic flow and fracture in solids. *J. Math. Mech.* 7 (1958), 291-322. (A. M. Freudenthal) 20 #3682.

Plastic disturbances whose speed of propagation is less than the velocity of a shear wave. *J. Math. Mech.* 7 (1958), 893-900. (P. G. Hodge, Jr.) 20 #4977.

---- and Titt, E. W.

On the elementary solution of the general linear differential equation of the second order with analytic coefficients. *J. Math. Pures Appl.* 18, 217-248 (1939). (Feller) 1-120. Thomas, Walker H. (See also Astrahan, M. M.)

Fundamentals of digital computer programming. *Proc. I. R. E.* 41, 1245-1249 (1953). 15-902. Thomasian, A. J.

Distances et normes sur les espaces de variables aléatoires. *C. R. Acad. Sci. Paris* 242 (1956), 447-448. (S.-T. C. Moy) 17-864.

Metrics and norms on spaces of random variables. *Ann. Math. Statist.* 28 (1957), 512-514. (S. T. C. Moy) 19-466. Thomée, Vidar.

Estimates of the Friedrichs-Lewy type for a hyperbolic equation with three characteristics. *Math. Scand.* 3, 115-123 (1955). (H. G. Garnir) 17-270.

Estimates of the Friedrichs-Lewy type for mixed problems in the theory of linear hyperbolic differential equations in two independent variables. *Math. Scand.* 5 (1957), 93-113. (R. McKelvey) 19-1059.

Thomescheit, Alfred.

Trigonometrische Durchrechnung von Strahlen bei dezentrierten optischen Systemen aus sphärischen Flächen. *Z. Instrumentenkunde* 61, 201-208 (1941). (Kavanagh) 8-296.

- Differenzenformeln zur Berechnung der optischen Bildfehler meridionaler Strahlenbündel mit besonderer Berücksichtigung telezentrischen Strahlenganges im Bildraum. *Optik* 9, 360-378 (1952). (Marchand) 14-517.
- Die Lichtverteilung in geometrisch-optischen Zerstreuungsgestalten für beliebige Einstellenebenen bei optischen Systemen aus sphärischen Flächen. *Optik* 10, 221-236 (1953). (Marchand) 14-1148.
